### **ECSE Group completes final Stage of Major IT Project**

On Friday 12 May 2017, the ECSE Group completed the final phase of a major IT project aimed at modernizing its IT infrastructure. On Friday, the Group launched a new trading system, which replaces the legacy Sitrel Trading application used by the ECSE since its inception in 2011. The new trading system, like the new CSD deployed in the first phase of the project, was provided by the Montran Corporation.

With the successful launch of the new Trading System (TS), the ECSE has now completely renovated its trading and post-trade environment, which puts the Group back on the cutting edge of market technology. This allows the Group to enhance and optimise service delivery to its range of clients, and to facilitate the future growth and development of the securities markets in the region.

Management wishes to thank all stakeholders for their understanding, assistance and support during this exercise.
