FORM ECSRC – OR

(Select One)

QUARTERLY FINANCIAL REPORT for the period ended March 31, 2017
Pursuant to Section 98(2) of the Securities Act, 2001

OR

TRANSITION REPORT
for the transition period from _____ to _____
Pursuant to Section 98(2) of the Securities Act, 2001
(Applicable where there is a change in reporting issuer's financial year)

Issuer Registration Number: NCB12101979GR

Republic Bank (Grenada) Limited

(Exact name of reporting issuer as specified in its charter)

Grenada

(Territory or jurisdiction of incorporation)

P.O. Box 857, Republic House, Grand Anse, St. George, Grenada

(Address of principal executive Offices)

(Reporting issuer's:

Telephone number (including area code): 1 473 444 2265

Fax number: 1 473 444 5501

Email address: info@republicgrenada.com

(Former name, former address and former financial year, if changed since last report)

(Provide information stipulated in paragraphs 1 to 8 hereunder)

Indicate the number of outstanding shares of each of the reporting issuer's classes of common stock, as of the date of completion of this report. _____

CLASS	NUMBER
Common stock	1,627,673

SIGNATURES

A Director, the Chief Executive Officer and Chief Financial Officer of the company shall sign this Annual Report on behalf of the company. By so doing each certifies that he has made diligent efforts to verify the material accuracy and completeness of the information herein contained.

The Chief Financial Officer by signing this form is hereby certifying that the financial statements submitted fairly state the company's financial position and results of operations, or receipts and disbursements, as of the dates and period(s) indicated. The Chief Financial Officer further certifies that all financial statements submitted herewith are prepared in accordance with International Accounting Standards consistently applied (except as stated in the notes thereto) and (with respect to year-end figures) including all adjustments necessary for fair presentation under the circumstances.

INFORMATION TO BE INCLUDED IN FORM ECSRC-OR

1. Financial Statements

Provide Financial Statements for the period being reported in accordance with International Accounting Standards. The format of the financial statements should be similar to those provided with the registration statement. Include the following:

- (a) Condensed Balance Sheet as of the end of the most recent financial year and just concluded reporting period.
- (b) Condensed Statement of Income for the just concluded reporting period and the corresponding period in the previous financial year along with interim three, six and nine months of the current financial year and corresponding period in the previous financial year.
- (c) Condensed Statement of Cash Flows for the just concluded reporting period and the corresponding period in the previous financial year along with the interim three, six and nine months of the current financial year and the corresponding period in the previous financial year.
- (d) By way of *Notes to Condensed Financial Statements*, provide explanation of items in the financial statements and indicate any deviations from generally accepted accounting practices.

2. Management's Discussion and Analysis of Financial Condition and Results of Operation.

Discuss the reporting issuer's financial condition covering aspects such as liquidity, capital resources, changes in financial condition and results of operations during the reporting period. Discussions of liquidity and capital resources may be combined whenever the two topics are interrelated. Discussion of material changes should be from the end of the preceding financial year to the date of the most recent interim report.

The Management's Discussion and Analysis should disclose sufficient information to enable investors to judge:

1. The quality of earnings;
2. The likelihood that past performance is indicative of future performance; and
3. The issuer's general financial condition and outlook.

It should disclose information over and above that which is provided in the management accounts and should not be merely a description of the movements in the financial statements in narrative form or an otherwise uninformative series of technical responses. It should provide management's perspective of the company that enables investors to view the business from the vantage point of management.

The discussion should focus on aspects such as liquidity; capital resources; changes in financial condition; results of operations; material trends and uncertainties and measures

taken or to be taken to address unfavourable trends; key performance indicators; and non-financial indicators.

General Discussion and Analysis of Financial Condition

During the six months to March 31, 2017, total assets increased by \$27M or 3.1%. Investment securities increased by \$18M or 9.5%. Cash resources increased by \$39M or 22.5% of which \$15M was Treasury bills purchased on the RGSM and \$8.1M new fixed deposit with a correspondent Bank. However, the total loan portfolio decreased by \$31M or 6.6%. Of the \$31M decrease in loans, \$8M represents a loan which was repaid and a new bond issued, EC\$5.7M repayment of two loans and EC\$2.8M represents partial repayment of another loan.

The Bank's top 20 borrowers represented 27.33% of total loans as at March 31, 2017 a slight increase from 27.23% as at December 31, 2016. Both the market and the Bank experienced a decrease in loans of 0.27% and 3.66% respectively during the period October 31, 2016 to January 31, 2017. For the period January 2016 to January 2017 while the market experienced a decrease of only 0.88% in loans, the Bank experienced a decrease 8.36%. As a result, the Bank's market share for loans as at January 31, 2017 decreased to 27.67% from 29.93% as at January 31, 2016.

During the quarter, the non-performing loan portfolio decreased by \$1M or 13.13%. Delinquency improved to 1.83% as at March 23, 2017 from 3.18% as at December 23, 2016. This improvement is due mainly to improvement in corporate arrears which reduced to 1.35% from 3.92% as at December 23, 2016.

The increase in total assets of \$27M during the six months to March 31, 2017 is reflected in the \$21M or 2.8% increase in deposits.

The Bank's top 10 deposit customers represented 22.29% of total deposits as at March 31, 2017, a slight decrease from 22.77% as at December 31, 2016. While the market experienced a slight increase in deposits of 0.50%, the Bank experienced a slight decrease of 0.78% during the period October 2016 to January 2017. For the period January 2016 to January 2017, both the market and the Bank experienced increase in deposits with the market deposits increasing by 1.50% while the Bank deposits increasing by 6.85% during the same period. The Bank's market share for deposits as at January 31, 2017 increased to 27.56% compared to 26.19% as at January 31, 2016.

Liquidity and Capital Resources

Provide a narrative explanation of the following (but not limited to):

- i) The reporting issuer's financial condition covering aspects such as liquidity, capital resources, changes in financial condition and results of operations.
- ii) Any known trends, demands, commitments, events or uncertainties that will result in, or that are reasonably likely to result in, the issuer's liquidity increasing or decreasing in any material way. If a deficiency is identified, indicate the course of action that the reporting issuer has taken or proposes to take to remedy the deficiency.
- iii) The issuer's internal and external sources of liquidity and any material unused sources of liquid assets.
- iv) Provisions contained in financial guarantees or commitments, debt or lease agreements or other arrangements that could trigger a requirement for an early payment, additional collateral support, changes in terms, acceleration of maturity, or the creation of an additional financial obligation such as adverse changes in the issuer's financial ratios, earnings, cash flows or stock price or changes in the value of underlying, linked or indexed assets.

- v) Circumstances that could impair the issuer's ability to continue to engage in transactions that have been integral to historical operations or are financially or operationally essential or that could render that activity commercially impracticable such as the inability to maintain a specified level of earnings, earnings per share, financial ratios or collateral.
- vi) Factors specific to the issuer and its markets that the issuer expects will affect its ability to raise short-term and long-term financing, guarantees of debt or other commitment to third parties, and written options on non-financial assets.
- vii) The relevant maturity grouping of assets and liabilities based on the remaining period at the balance sheet date to the contractual maturity date. Commentary should provide information about effective periods and the way the risks associated with different maturity and interest profiles are managed and controlled.
- viii) The issuer's material commitments for capital expenditures as of the end of the latest fiscal period, and indicate the general purposes of such commitments and the anticipated source of funds needed to fulfil such commitments.
- ix) Any known material trends, favorable or unfavorable, in the issuer's capital resources, including any expected material changes in the mix and relative cost of capital resources, considering changes between debt, equity and any off-balance sheet financing arrangements.

Discussion of Liquidity and Capital Resources

During the quarter to March 31, 2017, the net liquid asset ratio increased to 51.96% from 49.62% as at December 31, 2016, well in excess of the prudential guideline of 20%. Of the 51.96% net liquid asset ratio as at March 31, 2017, 17.05% represents un-invested funds compared to 15.62% of the 49.62% as at December 31, 2016. With the scope to increase the loan portfolio limited, we are constantly in contact with Republic Bank Limited seeking suitable investment opportunities as a way of managing the excess liquidity.

Liquidity in Grenada decreased slightly between October 2016 and December 2016, with the loan to deposit ratio of all commercial banks moving from 59.53 percent to 59.59 percent. The Bank's liquidity however, increased with a loan to deposit ratio of 55.39 percent as at March 31, 2017 from 56.86 percent at December 31, 2016.

During the half year to March 31, 2017 the Bank's Tier 1 capital to total adjusted risk weighted assets, increased to 14.7% and total qualifying capital to total adjusted risk weighted assets increased to 16.1% compared to 14.3% and 15.5% respectively as at September 2016 as a result of the Rights Issue in January 2017 which increased Stated Capital by \$5.7M. Both ratios exceed the minimum established by the Basel Committee.

As part of the Asset and Liability Committee monthly reporting, a Gap analysis is performed as a way of monitoring, managing and controlling risks associated with different maturity and interest profiles.

Off Balance Sheet Arrangements

Provide a narrative explanation of the following (but not limited to):

- i) Disclosures concerning transactions, arrangements and other relationships with unconsolidated entities or other persons that are reasonably likely to materially affect liquidity or the availability of, or requirements for capital resources.
- ii) The extent of the issuer's reliance on off-balance sheet arrangements should be described fully and clearly where those entities provide financing, liquidity, market or credit risk support, or expose the issuer to liability that is not reflected on the face of the financial statements.
- iii) Off-balance sheet arrangements such as their business purposes and activities, their economic substance, the key terms and conditions of any commitments, the initial on-going relationship with the issuer and its affiliates and the potential risk exposures resulting from its contractual or other commitments involving the off-balance sheet arrangements.
- iv) The effects on the issuer's business and financial condition of the entity's termination if it has a finite life or it is reasonably likely that the issuer's arrangements with the entity may be discontinued in the foreseeable future.

N/A

Results of Operations

In discussing results of operations, issuers should highlight the company's products and services, facilities and future direction. There should be a discussion of operating considerations and unusual events, which have influenced results for the reporting period. Additionally, any trends or uncertainties that might materially affect operating results in the future should be discussed.

Provide a narrative explanation of the following (but not limited to):

- i) Any unusual or infrequent events or transactions or any significant economic changes that materially affected the amount of reported income from continuing operations and, in each case, the extent to which income was so affected.
- ii) Significant components of revenues or expenses that should, in the company's judgment, be described in order to understand the issuer's results of operations.
- iii) Known trends or uncertainties that have had or that the issuer reasonably expects will have a material favorable or unfavorable impact on net sales or revenues or income from continuing operations.
- iv) Known events that will cause a material change in the relationship between costs and revenues (such as price increases, costs of labour or materials), and changes in relationships should be disclosed.
- v) The extent to which material increases in net sales or revenues are attributable to increases in prices or to increases in the volume or amount of goods or services being sold or to the introduction of new products or services.
- vi) Matters that will have an impact on future operations and have not had an impact in the past.
- vii) Matters that have had an impact on reported operations and are not expected to have an impact upon future operations
- viii) Off-balance sheet transactions, arrangements, obligations (including contingent obligations), and other relationships that have or are reasonably likely to have a current or future effect on the registrant's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.
- ix) Performance goals, systems and, controls.

Overview of Results of Operations

The Bank recorded Net Profit after tax of \$2.343 million for the fiscal half year ended March 31, 2017 an increase of \$1.647 million over the 0.696 million recorded for the corresponding period last year.

This year's performance was negatively impacted by a loss of \$445K on the sale of Government of Barbados bond while last year's performance was negatively impacted by an impairment expense of \$3.4 million on the restructure of the last remaining portion of the Government of Grenada debt partly offset by a gain on sale of securities of \$2.0 million. When these one off- items are excluded our adjusted Operating Profit for the half year to March 2017 of \$2.788 million is 131.26% or 0.664 million more than the adjusted profit for the corresponding period last year.

The increase in the adjusted operating profit is mainly due to an increase in investment income partly off-set by a decrease in interest on loans.

3. Disclosure about Risk Factors.

Provide a discussion of the risk factors that may have an impact on the results from operations or on the financial conditions. Avoid generalised statements. Typical risk factors include untested products, cash flow and liquidity problems, dependence on a key supplier or customer, management inexperience, nature of business, absence of a trading market (specific to the securities of the reporting issuer), etc. Indicate if any risk factors have increased or decreased in the time interval between the previous and current filing.

The Bank manages a variety of risks in the ordinary course of business. The major risks associated with its business are credit risk, interest rate risk, market risk, liquidity risk, currency risk and operational risk. An affiliated company, Republic Bank Limited, lends its support to the Bank in managing these risks.

Credit Risk

Credit Risk is the potential that a borrower or counterparty will fail to meet its stated obligations in accordance with agreed terms. The effective management of credit risk is a key element of a comprehensive approach to risk management and is considered essential to the long term success of the Bank. The Bank's credit risk management process operates on the basis of a hierarchy of discretionary authorities. The Republic Group Risk Management Unit supports the Bank in ensuring that loans and advances are made in accordance with sound banking practice, current legislation and in accordance with the applicable general policy of the Bank as laid down from time to time. The risk management function is kept from and independent of the business development aspect of operations.

The Bank uses a risk rating system which groups commercial/corporate accounts into various risk categories to facilitate the management of risk on both an individual account and portfolio basis. Trend indicators are also used to evaluate risk as improving, static or deteriorating. The evaluation of the risk and trend inform the credit decision and determines the intensity of the monitoring process.

The credit control processes emphasize early detection of deterioration and prompt implementation of remedial action and where it is considered that recovery of the outstanding liability may be doubtful or unduly delayed, such accounts are transferred from performing to non-performing status.

As a prudent policy, loan loss provisions are set aside to cover any potential loss in respect of debts that are not performing satisfactorily. A review of these provisions is conducted quarterly in accordance with laid down guidelines and recommended provisions arising out of these reviews are submitted to the Board for approval.

Interest Rate and Market Risks

Interest rate risk is the exposure of interest bearing assets and liabilities to movements in interest rate. The Asset/Liability Committee reviews on a monthly basis the non-credit and non-operational risks for the Bank. The primary tools currently in use are gap analysis, interest rate sensitivity analysis and exposure limits for both assets and liabilities.

Liquidity Risk

Liquidity risk is defined as the risk of the Bank not having sufficient financial resources available to meet all its obligations and commitments as they fall due, or can access these only at excessive cost. Liquidity management is designed to ensure that funding requirements can be met, including the replacement of existing funds as they mature or are withdrawn, or to satisfy the demands of customers for additional borrowings. A substantial portion of the bank is funded with "core deposits". The Bank has access to the Inter Bank Market within the Eastern Caribbean Currency Union and Republic Group's funding to provide additional liquidity as conditions demand. The Bank can also use its significant investments in regional Government securities for liquidity support. The Bank continually balances the need for short-term assets which have lower yields, with the need for higher asset returns.

Currency Risk

Currency Risk is the exposure of the Bank's financial condition to unfavourable movements in foreign currency exchange rates. In recognition of this risk, the Bank has established limits for uncovered holdings in each foreign currency.

Operational Risk

Operational risk is inherent in all business activities and is the potential for financial or reputational loss arising from inadequate or failed internal control, operational processes or the systems that support them. It includes errors, omissions, disasters and deliberate acts such as fraud. The Bank recognizes that such risk can never be entirely eliminated and manages the risk through a combination of systems and procedures to monitor and document transactions. Where appropriate, some risk is transferred by the placement of adequate insurance coverage. The Bank has developed contingency arrangements to support operations in the event of disaster.

4. Legal Proceedings.

A legal proceeding need only be reported in the ECSRC – OR filed for the period in which it first became a reportable event and in subsequent interim reports in which there have been material developments. Subsequent Form ECSRC – OR filings in the same financial year in which a legal proceeding or a material development is reported should reference any previous reports in that year. Where proceedings have been terminated during the period covered by the report, provide similar information, including the date of termination and a description of the disposition thereof with respect to the reporting issuer and its subsidiaries.

As at March 31, 2017 there were certain legal proceedings outstanding against the Bank. Professional advice indicates that it is unlikely that any significant loss will arise.

5. Changes in Securities and Use of Proceeds.

- (a) Where the rights of the holders of any class of registered securities have been materially modified, give the title of the class of securities involved. State briefly the general effect of such modification upon the rights of holders of such securities.

None

(a) Where the use of proceeds of a security issue is different from that which is stated in the registration statement, provide the following:

- Offer opening date (provide explanation if different from date disclosed in the registration statement)

- Offer closing date (provide explanation if different from date disclosed in the registration statement)

- Name and address of underwriter(s)

- Amount of expenses incurred in connection with the offer _____

- Net proceeds of the issue and a schedule of its use

- Payments to associated persons and the purpose for such payments

(c) Report any working capital restrictions and other limitations upon the payment of dividends.

The Bank cannot pay a dividend without the Central Bank's approval, if the payment would result in an impairment of the capital required under section 44 of the Banking Act of 2015 or if the Bank makes a net loss for that financial year.

6. Defaults upon Senior Securities.

- (a) If there has been any material default in the payment of principal, interest, a sinking or purchase fund instalment, or any other material default not satisfied within 30 days, with respect to any indebtedness of the reporting issuer or any of its significant subsidiaries exceeding 5 per cent of the total assets of the reporting issuer and its consolidated subsidiaries, identify the indebtedness. Indicate the nature of the default. In the case of default in the payment of principal, interest, or a sinking or purchase fund instalment, state the amount of the default and the total arrears on the date of filing this report.

None

- (b) If any material arrears in the payment of dividends have occurred or if there has been any other material delinquency not satisfied within 30 days, give the title of the class and state the amount and nature of the arrears or delinquency.

None

7. Submission of Matters to a Vote of Security Holders.

If any matter was submitted to a vote of security holders through the solicitation of proxies or otherwise during the financial year covered by this report, furnish the following information:

- (a) The date of the meeting and whether it was an annual or special meeting.

None

- (b) If the meeting involved the election of directors, the name of each director elected at the meeting and the name of each other director whose term of office as a director continued after the meeting.

--

- (c) A brief description of each other matter voted upon at the meeting and a statement of the number of votes cast for or against as well as the number of abstentions as to each such matter, including a separate tabulation with respect to each nominee for office.

--

- (d) A description of the terms of any settlement between the registrant and any other participant.

--

- (e) Relevant details of any matter where a decision was taken otherwise than at a meeting of such security holders.

--

8. Other Information.

The reporting issuer may, at its option, report under this item any information, not previously reported in a Form ECSRC – MC report (used to report material changes), with respect to which information is not otherwise called for by this form, provided that the material change occurred within seven days of the due date of the Form ECSRC-OR report. If disclosure of such information is made under this item, it need not be repeated in a Form ECSRC – MC report which would otherwise be required to be filed with respect to such information or in a subsequent Form ECSRC – OR report.

None
