Independent Auditors' Report

To the Shareholders of East Caribbean Financial Holding Company Limited PricewaterhouseCoopers

Pointe Seraphine P.O. Box 195 Castries St. Lucia, West Indies Telephone (758) 456-2600 Facsimile (758) 452-1061

Report on the Financial Statements

We have audited the accompanying consolidated financial statements of **East Caribbean Financial Holding Company Limited** (the Company) and its subsidiaries (the Group) which comprise the consolidated balance sheet as of December 31, 2010 and the consolidated statements of income, comprehensive income, changes in equity and cash flows for the year then ended and a summary of significant accounting policies and other explanatory notes.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Group as of December 31, 2010, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards.

(in thousands of Eastern Caribbean dollars)

1 General information

East Caribbean Financial Holding Company Limited (the Company) was formed pursuant to an Agreement for Amalgamation (the Agreement) dated March 31, 2001, between National Commercial Bank of Saint Lucia Limited (NCB), a company incorporated in Saint Lucia and continued under the Companies Act, 1996 of Saint Lucia and Saint Lucia Development Bank (SLDB), a company reincorporated under the same Act. Under the terms of the Agreement the companies agreed to amalgamate in accordance with the provisions of the Companies Act, 1996 from July 1, 2001 and to continue as one company as at the date of the Certificate of Amalgamation. The Certificate of Amalgamation was issued on June 30, 2001.

In addition to compliance with the Companies Act of Saint Lucia, certain entities within the East Caribbean Financial Holding Company Limited Group are subject to the provisions of the Banking Act, 1991, Insurance Act, 1995 and International Business Companies Act, 1999.

The principal activity of the Group is the provision of financial services. The registered office and principal place of business of the Company is located at No.1 Bridge Street, Castries, Saint Lucia.

The Company is listed on the Eastern Caribbean Securities Exchange.

2 Summary of significant accounting policies

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

Basis of preparation

East Caribbean Financial Holding Company Limited's consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS).

The consolidated financial statements have been prepared under the historical cost convention, as modified by the revaluation of available-for-sale financial assets and financial assets held at fair value through profit or loss classified in the consolidated balance sheet as trading financial assets and land and buildings classified as property and equipment and investment properties.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 4.

Notes to Consolidated Financial Statements

December 31, 2010

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies...continued

Basis of preparation ...continued

(a) Standards and amendments effective and relevant to the Group

The following standards and amendments to existing standards have been published.

The following standards and amendments to existing standards have been published and are mandatory for the Group's accounting periods beginning on or after January 1, 2010 or later periods,

- IAS 27 (Revised), 'Consolidated and separate financial statements' (effective from 1 July 2009). The revised standard requires the effects of all transactions with non-controlling interests to be recorded in equity if there is no change in control and these transactions will no longer result in goodwill or gains and losses. The standard also specifies the accounting when control is lost. Any remaining interest in the entity is re-measured to fair value and a gain or loss is recognised in profit or loss.
- *IFRS 3 (Revised)*, 'Business combinations' (effective from 1 July 2009). The revised standard continues to apply the acquisition method to business combinations, with some significant changes. For example, all payments to purchase a business are to be recorded at fair value at the acquisition date, with contingent payments classified as debt subsequently re-measured through the income statement. There is a choice on an acquisition-by-acquisition basis to measure the non-controlling interest in the acquiree either at fair vale or at the non-controlling interest's proportionate share of the acquiree's net assets. All acquisition-related costs should be expensed.

(b) Standards and revisions to standards not yet effective and relevant to the Group New standards, revisions issued but not yet effective for the financial year beginning January 1, 2010 and not early adopted.

The company's assessment of the impact of these new standards is set out below.

- IFRS 9, 'Financial instruments', issued in November 2009. This standard is the first step in the process to replace IAS 39, 'Financial instruments: recognition and measurement'. IFRS 9 introduces new requirements for classifying and measuring financial assets and is likely to affect the Company's accounting for its financial assets. The standard is not applicable until January 1, 2013 but is available for early adoption.
 - The Company is yet to assess IFRS 9's full impact. However, initial indications are that it may affect the Company's accounting for its debt available-for-sale financial assets, as IFRS 9 only permits the recognition of fair value gains and losses in other comprehensive income if they relate to equity investments that are not held for trading. Fair value gains and losses on available-for-sale debt investments, for example, will therefore have to be recognised directly in profit or loss. In the current reporting period no such gains/losses were recorded in other comprehensive income.
- Revised IAS 24 (revised), 'Related party disclosures', issued in November 2009. It supersedes IAS 24, 'Related party disclosures', issued in 2003. IAS 24 (revised) is mandatory for periods beginning on or after January 1, 2011. The Company will apply the revised standard from 1 January 2011. The company is currently putting systems in place to capture the necessary information. It is, therefore, not possible at this stage to disclose the impact, if any, of the revised standard on the related party disclosures.

(c) Early adoption of standards
The Group did not early-adopt new or amended standards in 2010.

Notes to Consolidated Financial Statements

2 Summary of significant accounting policies...continued

Consolidation

The financial statements of the subsidiaries used to prepare the consolidated financial statements were prepared as of the parent company's reporting date. The consolidation principles are unchanged as against the previous year.

The consolidated financial statements of the Group comprise the financial statements of the parent entity and all subsidiaries as of December 31, 2010.

(a) Subsidiaries

Subsidiaries are all entities over which the Group has the power to govern the financial and operating policies generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

The results of the subsidiaries acquired or disposed of during the year are included in the consolidated statement of income from the effective acquisition date or up to the effective date on which control ceases, as appropriate.

The Group uses the acquisition method of accounting to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred and the equity interests issued by the group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Acquisition-related costs are expensed as incurred. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. On an acquisition-by-acquisition basis, the group recognises any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's net assets. Investments in subsidiaries are accounted for at cost less impairment. Cost is adjusted to reflect changes in consideration arising from contingent consideration amendments. Cost also includes direct attributable costs of investment.

The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the group's share of the identifiable net assets acquired is recorded as goodwill. If this is less than the fair value of the net assets of the subsidiary acquired in the case of a bargain purchase, the difference is recognised directly in the statement of comprehensive income.

Inter-company transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of impairment of the asset transferred.

The integration of the subsidiaries into the consolidated financial statements is based on consistent accounting and valuation methods for similar transactions and other occurrences under similar circumstances.

Notes to Consolidated Financial Statements **December 31, 2010**

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies...continued

Consolidation..continued

(b) Transactions and non-controlling interests

The Group treats transactions with non-controlling interests as transactions with equity owners of the group. For purchases from non-controlling interests, the difference between any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.

When the Group ceases to have control or significant influence, any retained interest in the entity is remeasured to its fair value, with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.

If the ownership interest in an associate is reduced but significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income are reclassified to profit or loss where appropriate

(c) Associates

Associates are entities over which the Group has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Investment in associate is accounted for by the equity method of accounting and initially recognised at cost.

The Group's share of its associate's post-acquisition profits or losses is recognised in the consolidated statement of income, and its share of post-acquisition movements in reserves recognised in reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any unsecured receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate.

Unrealised gains on transactions between the Group and its associate are eliminated to the extent of the Group's interest in the associate. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

(d) Joint ventures

A joint venture exists where the Group has a contractual arrangement with one or more parties to undertake activities typically, however not necessarily, through entities that are subject to joint control. The Group recognises interests in a jointly controlled entity using the equity method. The Group's share of the results of joint ventures is based on financial statements made up to a date not earlier than three months before the date of the statement of financial position, adjusted to conform with the accounting polices of the Group. Intragroup gains on transactions are eliminated to the extent of the Group's interest in the investee. Intragroup losses are also eliminated unless the transaction provides evidence of impairment in the asset transferred.

Cash and cash equivalents

For the purposes of the cash flow statement, cash and cash equivalents comprise balances with less than three months' maturity from the date of acquisition including: cash and non-restricted balances with the Central Bank, treasury bills, deposits with other banks, deposits with a non-bank financial institutions and other short-term securities.

2 Summary of significant accounting policies...continued

Financial assets

The Group allocates financial assets to the following IAS 39 categories: financial assets at fair value through profit or loss; loans and receivables; held-to-maturity investments; and available-for-sale financial assets. Management determines the classification of its financial instruments at initial recognition.

(a) Financial assets at fair value through profit or loss

This category has two sub-categories; financial assets held for trading, and those designated at fair value through profit or loss at inception. A financial asset is classified as fair value through profit and loss if acquired principally for the purpose of selling in the short term or if so designated by management.

A financial asset is classified as held for trading if it is acquired or incurred principally for the purpose of selling or repurchasing it in the near term or if it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking.

Financial instruments included in this category are recognised initially at fair value; transaction costs are taken directly to the consolidated statement of income. Gains and losses arising from changes in fair value are included directly in the consolidated statement of income and are reported as 'Fair value gains. Interest income and expense and dividend income and expenses on financial assets held for trading are included in 'Net interest income. The instruments are derecognised when the rights to receive cash flows have expired or the Group has transferred substantially all the risks and rewards of ownership and the transfer qualifies for derecognising.

(b) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than: (a) those that the entity intends to sell immediately or in the short term, which are classified as held for trading, and those that the entity upon initial recognition designates as at fair value through profit or loss; (b) those that the entity upon initial recognition designates as available for sale; or (c) those for which the holder may not recover substantially all of its initial investment, other than because of credit deterioration.

Loans and receivables are initially recognised at fair value – which is the cash consideration to originate or purchase the loan including any transaction costs – and measured subsequently at amortised cost using the effective interest rate method. Loans and receivables are reported in the consolidated balance sheet as loans and advances to customers or as investment securities. Interest on loans and receivables is included in the consolidated statement of income. In the case of impairment, the impairment loss is reported as a deduction from the carrying value of the loan and receivables and recognised in the consolidated statement of income.

(c) Held-to-maturity

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Group's management has the positive intention and ability to hold to maturity, other than: (a) those that the Group upon initial recognition designates as at fair value through profit or loss; (b) those that the Group designates as available for sale; and (c) those that meet the definition of loans and receivables. These are initially recognised at fair value including direct and incremental transaction costs are measured subsequently at amortised cost, using the effective interest method. Interest on held-to-maturity investments is included in the consolidated statement of income. In the case of an impairment, the impairment loss is reported as a deduction from the carrying value of the investment and recognised in the consolidated statement of income.

If the Group were to sell other than an insignificant amount of held-to-maturity assets, the entire category would be tainted and reclassified as available for sale.

Notes to Consolidated Financial Statements

December 31, 2010

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies...continued

Financial assets ... continued

(d) Available-for-sale financial assets

A vailable-for-sale investments are financial assets that are intended to be held for an indefinite period of time, which may be sold in response to needs for liquidity or changes in interest rates, exchange rates or equity prices or that are not classified as loans and receivables, held to-maturity investments or financial assets at fair value through profit or loss.

Available-for-sale financial assets are initially recognised at fair value, which is the cash consideration including any transaction costs, and measured subsequently at fair value with gains and losses being recognised in the consolidated statement of comprehensive income, except for impairment losses and foreign exchange gains and losses, until the financial asset is derecognised. If an available-for-sale financial asset is determined to be impaired, the cumulative gain or loss previously recognised in the consolidated statement of comprehensive income is recognised in the consolidated statement of income. Interest is calculated using the effective interest method, and foreign currency gains and losses on monetary assets classified as available for sale are recognised in the consolidated statement of income. Dividends on available-for-sale equity instruments are recognised in the consolidated statement of income when the Group's right to receive payment is established.

(e) Recognition

The Group uses trade date accounting for regular way contracts when recording financial asset transactions. Financial assets that are transferred to a third party but do not qualify for derecognition are presented in the consolidated balance sheet as 'Assets pledged as collateral', if the transferree has the right to sell or repledge them.

Assets carried at amortised cost

The Group assesses at each reporting date whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred if, and only if, there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

The criteria that the Group uses to determine that there is objective evidence of an impairment loss include:

- (i) significant financial difficulty of the issuer or obligor;
- (ii) a breach of contract, such as a default or delinquency in interest or principal payments;
- (iii) the Group granting to the borrower, for economic or legal reasons relating to the borrower's financial difficulty, a concession that the lender would not otherwise consider;
- (iv) it becoming probable that the borrower will enter bankruptcy or other financial reorganisation;
- (v) the disappearance of an active market for that financial asset because of financial difficulties; or
- (vi) observable data indicating that there is a measurable decrease in the estimated future cash flows from a
 group of financial assets since the initial recognition of those assets, although the decrease cannot yet be
 identified with the individual financial assets in the group, including;
 - adverse changes in the payment status of borrowers in the group; or
 - national or local economic conditions that correlate with defaults on the assets in the group.

The estimated period between a loss occurring and its identification is determined by local management for each identified portfolio. In general, the periods used vary between three months and 12 months; in exceptional cases, longer periods are warranted.

Notes to Consolidated Financial Statements

2 Summary of significant accounting policies...continued

Impairment of financial assets...continued

(e) Recognition ... continued

Assets carried at amortised cost ...continued

The Group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If the Group determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the assets in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised are not included in a collective assessment of impairment.

If there is objective evidence that an impairment loss on loans and receivables or held-to-maturity investments carried at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in the consolidated statement of income. If a loan or held-to-maturity investment has variable interest rates, the discount rate for measuring any impairment loss is the current effective interest rate determined under the contract. As a practical expedient, the Group may measure impairment on the basis of an instrument's fair value using the observable market price.

The calculation of the present value of the estimated future cash flows of a collateralised financial asset reflects the cash flows that may or may not result from foreclosure less costs for obtaining and selling the collateral, whether or not the foreclosure is probable.

When a loan is uncollectible, it is written off against the related provision for loan impairment. Such loans are written off after all the necessary procedures have been completed and the amount of the loss has been determined. Subsequent recoveries of amounts previously written off decrease the amount of the provision for the loan impairment in the consolidated statement of income.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the previously recognised impairment loss is reversed by adjusting the allowance account. The amount of the reversal is recognised in the consolidated statement of income.

Assets classified as available for sale

The Group assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired. In the case of equity investments classified as available for sale, a significant or prolonged decline in the fair value of the security below its cost is considered in determining whether the assets are impaired. If any such evidence exists for available-for-sale financial assets, the cumulative loss measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in the statement of income is removed from equity and recognised in the consolidated statement of income on equity instruments are not reversed through the consolidated statement of income, if any. If, in a subsequent period, the fair value of a debt instrument classified as available for sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in the statement of income, the impairment loss is reversed through the consolidated statement of income, if any.

Notes to Consolidated Financial Statements

December 31, 2010

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies...continued

Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

Sale and repurchase agreements

Securities sold subject to repurchase agreements ('repos') are classified in the financial statements as pledged assets when the transferee has the right to contract or custom to sell or repledge the collateral; the counterparty liability is included in other funding instruments in the balance sheet. The difference between sale and repurchase price is treated as interest and accrued over the life of the agreement using the effective interest method.

Property and equipment

Land and buildings comprises mainly of branches and offices occupied by the parent or its subsidiaries. Land and buildings are shown at fair value less subsequent depreciation for buildings. Valuations are reviewed annually by quantity surveyors. The valuation indicated that the market value was consistent with the carrying amount of the respective assets in the books of the Group. All other property and equipment is stated at historical cost less accumulated depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent expenditures are included in the asset's carrying amount or are recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to the consolidated statement of income during the financial period in which they are incurred.

Increases in the carrying amount arising on revaluation of land and buildings are credited to other comprehensive income. Decreases that offset previous increases of the same asset are charged against other comprehensive income, all other decreases are charged to the statement of income. Each year the difference between depreciation based on the revalued carrying amount of the asset charged to the statement of income and depreciation based on the asset's original cost is transferred from "revaluation reserve" to "retained earnings".

Land is not depreciated. Depreciation on other assets is calculated on the straight-line method to allocate their cost to their residual values over their estimated useful lives as follows:

Buildings	2%
Leasehold improvements	2% - 33 1/3%
Motor vehicles	20-25%
Office furniture & equipment	10% - 20%
Computer equipment	33 1/3%

The assets' residual values and useful lives are reviewed, and adjusted if appropriate at each balance sheet date. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carry amount is greater than its estimated recoverable amount. The recoverable amount is the higher of the asset's fair value less cost to sell and value in use

Gains and losses on disposal are determined by comparing proceeds with carrying amount and are included in the consolidated statement of income.

Notes to Consolidated Financial Statements **December 31, 2010**

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies...continued

Investment properties

Properties that are held for long-term rental yields or for capital appreciation or both, and that are not occupied by the entities in the consolidated group, are classified as investment properties. Investment property, comprises freehold land and building which are leased out under operating leases. Some properties may be partially occupied by the Group, with the remainder being held for rental income or capital appreciation. If that part of the property occupied by the Group can be sold separately, the Group accounts for the portions separately. The portion that is owner-occupied is accounted for under IAS 16, and the portion that is held for rental income or capital appreciation or both is treated as investment property under IAS 40.

Recognition of investment properties takes place only when it is probable that the future economic benefits that are associated with the investment property will flow to the entity and the cost can be measured reliably. This is usually the day when all risks are transferred. Investment properties are measured initially at cost, including transaction costs. The carrying amount includes the cost of replacing parts of an existing investment property at the time the cost was incurred if the recognition criteria are met; and excludes the costs of day-to-day servicing of an investment property.

Subsequent to initial recognition, investment properties are stated at fair value, which reflects market conditions at the date of the consolidated balance sheet. Gains or losses arising from changes in the fair value of investment properties are included in the consolidated income statement in the year in which they arise.

Subsequent expenditure is included in the asset's carrying amount only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance costs are charged to the consolidated income statement during the financial period in which they are incurred.

Investment property is carried at fair value, representing open market value determined annually by external professionally qualified valuers. Fair value is based on active market prices, adjusted, if necessary, for any difference in the nature, location or condition of the specific asset. If the information is not available, the Group uses alternative valuation methods such as recent prices on less active markets or discounted cash flow projections.

Property that is under construction or development for future use as investment property is measured at fair value. Where the fair value of investment property under construction is not reliably measurable, the property is measured at cost until the earlier of the date construction is completed and the date at which fair value becomes reliably measurable.

Notes to Consolidated Financial Statements

December 31, 2010

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies...continued

Intangible assets

Intangible assets comprise separately identifiable intangible items arising from business combinations, computer software licences and other intangible assets. Intangible assets are recognised at cost. The cost of an intangible asset acquired in a business combination is its fair value at the date of acquisition. Intangible assets with a definite useful life are amortized using the straight-line method over their estimated useful economic life, generally not exceeding 20 years.

Intangible assets with an indefinite useful life are not amortised. Generally, the identified intangible assets of the Group have a definite useful life. At each date of the consolidated statement of financial position, intangible assets are reviewed for indications of impairment or changes in estimated future economic benefits. If such indications exist, the intangible assets are analysed to assess whether their carrying amount is fully recoverable.

An impairment loss is recognized if the carrying amount exceeds the recoverable amount. The Group chooses to use the cost model for the measurement after recognition.

Intangible assets with indefinite useful life are annually tested for impairment and whenever there is an indication that the asset may be impaired.

(a) Computer software licences

Acquired computer software licences are capitalised on the basis of the costs incurred to (a), (b) acquire and bring to use the specific software. These costs are amortised on the basis of the expected useful lives. Software has a maximum expected useful life of 4 years.

(b) Other intangible assets

Other intangible assets consist of customer relationships (core deposit intangibles). Other intangible assets are initially recognised when they are separable or arise from contractual or other legal rights, the cost can be measured reliably and, in the case of intangible assets not acquired in a business combination, where it is probable that future economic benefits attributable to the assets will flow from their use. The value of intangible assets which are acquired in a business combination is generally determined using income approach methodologies such as the discounted cash flow method. Other intangible assets are stated at cost less amortisation and provisions for impairment, if any, plus reversals of impairment, if any. They are amortised over their useful lives in a manner that reflects the pattern to which they contribute to future cash flows, generally over 12 years.

Impairment of other non-financial assets

Assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment. Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash generating units).

2 Summary of significant accounting policies...continued

Insurance contracts

Recognition and measurement

The Group issues contracts that transfer insurance risk. Insurance contracts are those contracts that transfer significant insurance risk. As a general guideline, the Group defines as significant insurance risk the possibility of having to pay benefits on the occurrence of an insured event that are at least 10% more than the benefits payable if the insured event did not occur.

Insurance contracts issued are classified as short-term insurance contracts. Short-term insurance contracts are classified as general contracts or casualty contracts. General insurance contracts mainly compensate the Group's customers for damages suffered to their property or for the value of the property lost. Casualty insurance contracts protect the Group's customers against the risk of causing harm to third parties as a result of their legitimate activities. The typical protection offered is designed for employers who become legally liable to pay compensation to injured employees (employers' liability) and for individual and business customers who become liable to pay compensation to a third party for bodily harm or property damage (public liability).

For these contracts, premiums are recognised as revenue (earned premiums) over the period of coverage. The portion of premium received on in-force contracts that relates to unexpired risks at the balance sheet date is reported as the unearned premium liability. Premiums are shown before the deduction of commission.

Claims and loss adjustment expenses are charged to income as incurred based on the estimated liability for compensation owed to contract holders or third parties damaged by contract holders. They include direct and indirect claims settlement costs and arise from events that have occurred up to the balance sheet date even if they have not yet been reported to the Group. The Group does not discount its liabilities for unpaid claims. Liabilities for unpaid claims are estimated using the input of assessments for individual cases reported to the Group.

Reinsurance contracts held

Contracts entered into by the Group with reinsurers under which the Group is compensated for losses on one or more contracts issued by the Group and that meet the classification requirements for insurance contracts are classified as reinsurance contracts held.

The benefits to which the Group is entitled under its reinsurance contracts held are recognised as reinsurance assets. These assets consist of short-term balances due from reinsurers. Amounts recoverable from or due to reinsurers are measured consistently with the amounts associated with the reinsured insurance contracts and in accordance with the terms of each reinsurance contract. Reinsurance liabilities are primarily premiums payable for reinsurance contracts that are recognised as an expense when due.

The Group assesses its reinsurance assets for impairment. If there is objective evidence that the reinsurance asset is impaired, the Group reduces the carrying amount of the reinsurance assets to its recoverable amount and recognises that impairment loss in the statement of income. The Group assesses impairment for these financial assets using the same process for financial assets held at amortised cost. The impairment loss is also calculated following the same method used for these financial assets.

Notes to Consolidated Financial Statements

December 31, 2010

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies...continued

Insurance contracts...continued

Claims provision and related reinsurance recoveries

Provisions are made at the year end for the estimated cost of claims incurred but not yet settled at the balance sheet date, including the cost of claims incurred but not yet reported to the Group. The estimated cost of claims includes expenses to be incurred in settling the claims and a deduction for the expected value of salvage and other recoveries. The Group takes all reasonable steps to ensure that it has appropriate information regarding its claims exposures. However, given the uncertainty in establishing claims provisions, it is likely that the final outcome will prove to be different from the original liability established.

Receivables and payables related to insurance contracts

Receivables and payables are recognised when due. These include amounts due to and from agents, brokers and insurance contract holders.

If there is objective evidence that the insurance receivable is impaired, the Group reduces the carrying amount of the insurance receivable accordingly and recognises that impairment loss in the consolidated statement of income. The Group gathers the objective evidence that an insurance receivable is impaired using the same process adopted for loans and receivables. The impairment loss is also calculated under the same method used for these financial assets.

Premiums and unearned premiums

Premiums are earned over the term of the related insurance contracts in proportion to the period of risk. The reserve for unearned premiums is established for the portion of premiums written which relate to unexpired risks at the end of the period.

Premiums ceded are expensed over the term of the related insurance contracts in proportion to the period of risk, coterminous with the related gross premiums. The provision for deferred premiums is established for the portion of premiums ceded which relate to unexpired risks at the end of the period.

Deferred acquisition costs

Acquisition costs on premiums written vary with and are directly related to the production of business. These costs are deferred and recognised over the period of the policies to which they relate.

Claims and claims expenses

Claims and claims expenses are shown gross with amounts due under reinsurance contracts shown as reinsurance assets. Reserves for claims are recorded as incurred and represent estimates of future payments of reported and unreported claims and related expenses with respect to insured events that have occurred up to the balance sheet date. Reinsurance claims recoveries are estimated at the same time as the reserve for a claim is recorded. The provision reflects management's best estimate of the Group's ultimate liabilities and management believes that the provision is adequate.

Notes to Consolidated Financial Statements

December 31, 2010

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies...continued

Income tax

(a) Current tax

Income tax payable (receivable) is calculated on the basis of the applicable tax law in the respective jurisdiction and is recognised as an expense (income) for the period except to the extent that current tax related to items that are charged or credited in other comprehensive income. In these circumstances, current tax is charged or credited to other comprehensive income.

Where the Group has tax losses that can be relieved against a tax liability for a previous year, it recognises those losses as an asset, because the tax relief is recoverable by refund of tax previously paid. This asset is offset against an existing current tax balance. Where tax losses can be relieved only by carry-forward against taxable profits of future periods, a deductible temporary difference arises. Those losses carried forward are set off against deferred tax liabilities carried in the consolidated balance sheet.

The Group does not offset income tax liabilities and current income tax assets.

(b) Deferred tax

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax base of assets and liabilities and their carrying amounts in the financial statements. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred tax asset is realised or the deferred income tax liability is settled.

The principal temporary differences arise from depreciation of property and equipment and investment property, amortisation of intangible assets and their tax base, unutilised tax losses and pension gains. However, the deferred tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither the accounting, nor taxable profit or loss.

Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Borrowings

Borrowings are recognised initially at fair value, being their issue proceeds (fair value of consideration received) net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between proceeds net of transaction costs and the redemption value is recognised in the consolidated statement of income over the period of the borrowings using the effective interest method.

Redeemable preference shares

Preference shares which are mandatorily redeemable on a specific date are classified as liabilities. The dividend on these preference shares are recognised in the statement of income as interest expense.

Notes to Consolidated Financial Statements

December 31, 2010

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies...continued

Employee benefits

Pension obligations

The Group operates a defined benefit plan. The scheme is funded through payments to trustee-administered funds, determined by periodic actuarial calculations. A defined benefit plan is a pension plan that defines an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation. Actuarial valuations are undertaken annually.

The asset recognised in the consolidated balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets, together with adjustments for unrecognised actuarial gains or losses and past service costs. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash flows using interest rates of government securities which have terms to maturity approximating the terms of the related pension liability.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to income at the rate of 20%. Past-service costs are recognised immediately in income, unless the changes to the pension plan are conditional on the employees remaining service for a specified period of time (the vesting period).

Termination benefits

Termination benefits are payable when employment is terminated before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Group recognises termination benefits when it is demonstrably committed to either: terminating the employment of current employees according to a detailed formal plan without possibility of withdrawal; or providing termination benefits as a result of an offer made to encourage voluntary redundancy. Benefits falling due more that 12 months after the balance sheet date are discounted to present value.

Guarantees and letters of credit

Guarantees and letters of credit comprise undertakings by the Bank to pay bills of exchange drawn on customers. The Bank expects most guarantees and letters of credit to be settled simultaneously with the reimbursement from the customers. Such financial guarantees are given to banks, financial institutions and other bodies on behalf of customers.

Financial guarantees are initially recognised in the financial statements at fair value on the date the guarantee was given. The fair value of a financial guarantee at the time of signature is zero because all guarantees are agreed on arm's length terms and the value of the premium agreed corresponds to the value of the guarantee obligation. No receivable for the future premiums is recognised. Subsequent to initial recognition, the bank's liabilities under such guarantees are measured at the higher of the initial amount, less amortisation of fees recognised in accordance with IAS 18, and the best estimate of the amount required to settle the guarantee. These estimates are determined based on experience of similar transactions and history of past losses, supplemented by the judgement of management. The fee income earned is recognised on a straight-line basis over the life of the guarantee. Any increase in the liability relating to guarantees is reported in the statement of income within other operating expenses.

Fiduciary activities

The Group commonly acts as trustees and in other fiduciary capacities that result in the holding and placing of assets on behalf of individuals, trusts, retirement benefit plans and other institutions. These assets and income arising thereon are excluded from these consolidated financial statements, as they are not assets of the Group.

Notes to Consolidated Financial Statements

December 31, 2010

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies...continued

Share capital

(i) Share issue costs

Incremental costs directly attributable to the issue of new shares or options or to the acquisition of a business are shown in equity as a deduction, from the proceeds.

(ii) Dividends on ordinary shares

Dividends on ordinary shares are recognised in equity in the period in which they are declared. Dividends for the year that are declared after the balance sheet date are dealt with in the subsequent events note (Note 32 and 49).

(iii) Preference shares

Preference shares which are convertible to ordinary shares and are not redeemable on a specific date or at the option of the shareholder are classified as equity. The resulting dividends are recognised in the period they fall due.

Interest income and expense

Interest income and expense are recognised in the consolidated statement of income for all financial instruments measured at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial assets or a financial liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Group estimates cash flows considering all contractual terms of the financial instrument but does not consider future credit losses. The calculation includes all fees paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

Once a financial asset or a group of similar financial assets has been written down as a result of an impairment loss, interest income is recognised using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

Fee and commission income

Fees and commissions are generally recognised on an accrual basis when the service has been provided. Loan commitment fees for loans that are likely to be drawn down are deferred (together with related direct costs) and recognised as an adjustment to the effective interest rate on the loan. Commission and fees arising from negotiating, or participating in the negotiation of, a transaction for a third party, such as the arrangement of the acquisition of shares or other securities or the purchase or sale of a business, are recognised on completion of the underlying transaction. Portfolio and other management advisory and service fees are recognised based on the applicable service contracts, usually on a time apportioned basis. Asset management fees related to investment funds are recognised rateably over the period the service is provided. The same principle is applied for financial planning and custody services that are continuously provided over an extended period of time.

Notes to Consolidated Financial Statements

December 31, 2010

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies...continued

Premium income

Insurance premiums are charged to customers at inception. The consideration received is deferred as a liability and recognised over the life of the contract on a straight line basis.

Dividend income

Dividend income is recognised when the entity's right to receive payment is established.

Foreign currency translation

Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The consolidated financial statements are presented in thousands of Eastern Caribbean dollars, which is the Company's functional and the Group's presentation currency.

Transactions and balances

Foreign currency transactions that are transactions denominated, or that require settlement in a foreign currency are translated into the functional currency using the exchange rates prevailing at the dates of the transactions.

Monetary items denominated in foreign currency are translated with the closing rates as at the reporting date. Non monetary items measured at historical cost denominated in a foreign currency are translated with the exchange rate as at the date of initial recognition.

Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the consolidated statement of income.

In the case of changes in the fair value of monetary assets denominated in foreign currency classified as available for sale, a distinction is made between translation differences resulting from changes in amortised cost of the security and other changes in the carrying amount of the security. Translation differences related to changes in the amortised cost are recognised in profit or loss, and other changes in the carrying amount, except impairment, are recognised in other comprehensive income. Translation differences on non-monetary financial instruments, such as equities held at fair value through profit or loss, are reported as part of the fair value gain or loss. Translation differences on non-monetary financial instruments, such as equities classified as available-for-sale financial assets, are included in the other comprehensive income.

Group companies

The results and financial position of the Group entity with a functional currency of United States dollars is translated into the presentation currency using the pegged rate of EC\$2.70 = US\$1.00.

The results and financial position of all the group entities that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- Assets and liabilities for each balance sheet presented are translated at the closing rate at the date of the balance sheet:
- Income and expenses for each income statement are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions); and
- All resulting exchange differences are recognised in other comprehensive income.

Notes to Consolidated Financial Statements

December 31, 2010

(in thousands of Eastern Caribbean dollars)

2 Summary of significant accounting policies...continued

Leases

A group company is the lessee

The leases entered into by the Group are primarily operating leases. The total payments made under operating leases are charged to the consolidated statement of income on a straight-line basis over the period of the lease.

When an operating lease is terminated before the lease period is expired, any payment required to be made to the lessor by way of penalty is recognised as an expense in the period in which the termination takes place.

A group company is the lessor

Assets leased out under operating leases are included in investment properties in the balance sheet. They are depreciated over the expected useful life. Rental income is recognised in the consolidated statement of income on a straight-line basis over the period of the lease.

Financial instruments

Financial instruments carried on the consolidated balance sheet include cash resources, investment securities, loans and advances to customers, deposits with other banks, deposits from banks, due to customers and borrowings. The particular recognition methods adopted are disclosed in the individual policy statement associated with each item.

Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker is the person or group that allocates resources to and assesses the performance of the operating segments of an entity. The Group has determined the Company's Board of Directors as its chief operating decision maker.

All transactions between business segments are conducted on an arm's length basis, with intra-segment revenue and costs being eliminated in head office. Income and expenses directly associated with each segment are included in determining business segment performance.

In accordance with IFRS 8, the Group has the following reportable segments Domestic banking and other.

Comparatives

Except when a standard or an interpretation permits or requires otherwise, all amounts are reported or disclosed with comparative information.

Notes to Consolidated Financial Statements

(in thousands of Eastern Caribbean dollars)

3 Financial risk management

Strategy in using financial instruments

The Group's activities expose it to a variety of financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks. Taking risk is core to the financial business, and the operational risks are an inevitable consequence of being in business. The Group's aim is therefore to achieve an appropriate balance between risk and return and minimise potential adverse effects on the Group's financial performance.

The most important types of risk are credit risk, liquidity risk, market risk and other operational risk. Market risk includes currency risk and interest rate risk.

Credit risk

Credit risk is the risk of suffering financial loss, should any of the Group's customers, clients or market counterparties fail to fulfill their contractual obligations to the Group. Credit risk arises mainly from commercial and consumer loans and advances, credit cards, and loan commitments arising from such lending activities, but can also arise from credit enhancement provided, such as credit financial guarantees, letters of credit, endorsements and acceptances.

The Group is also exposed to other credit risks arising from investments in debt securities and other exposures arising from its trading activities ('trading exposures'), including non-equity trading portfolio assets.

Loans and advances

The Group takes on exposure to credit risk which, is the risk that a counterparty will be unable to pay amounts in full when due. Impairment provisions are provided for losses that have been incurred at the balance sheet date. Significant changes in the economy, or in the health of a particular industry segment that represents a concentration in the Group's portfolio, could result in losses that are different from those provided for at the balance sheet date. Management therefore carefully manages its exposure to credit risk.

Probability of default

The Group assesses the probability of default of individual counterparties using internal rating tools tailored to the various categories of counterparty. They have been developed based on the East Caribbean Central Bank prudential guidelines. Customers of the Group are segmented into five rating classes. The Group's rating scale, which is shown below, reflects the range of default probabilities defined for each rating class. This means that, in principle, exposures migrate between classes as the assessment of their probability of default changes. The rating tools are kept under review and upgraded as necessary.

Rating	Description of the grade
1	Pass
2	Special mention
3	Sub-standard
4	Doubtful
5	Loss

Credit risk...continued

Debt securities and other bills

For debt securities and other bills external rating such as Standard & Poor's and Caricris rating or their equivalents are used by the Asset Liability Committee for managing of the credit risk exposures. The investments in those securities and bills are viewed as a way to gain a better credit quality mapping and maintain a readily available source to meet the funding requirements at the same time.

The Group is also exposed to credit risk from insurance contracts as follows:

- reinsurer's share of insurance liabilities,
- amounts due from reinsurers in respect of claims already paid,
- amounts due from insurance contract holders, and
- amounts due from insurance intermediaries.

Reinsurance is used to manage insurance risk. This does not, however, discharge the Group's liability as primary insurer. If a reinsurer fails to pay a claim for any reason, the Group remains liable for the payment to the policy holder. The credit worthiness of the reinsurer is considered on an annual basis by reviewing their financial strength prior to finalisation of any contract.

Risk limit control and mitigation policies

The Group manages, limits and controls concentrations of credit risk wherever they are identified – in particular, to individual counterparties and groups, and to industries and countries.

The Group structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower, or groups of borrowers, and to the industry segments. Such risks are monitored on a revolving basis and subject to an annual or more frequent review, when considered necessary by the Board of Directors.

Exposure to credit risk is also managed through regular analysis of the ability of borrowers and potential borrowers to meet interest and capital repayment obligations and by changing these lending limits where appropriate.

Some other specific control and mitigation measures are outlined below.

Collateral

The Group employs a range of policies and practices to mitigate credit risk. The most traditional of these is the taking of security for funds advances, which is common practice. The Group implements guidelines on the acceptability of specific classes of collateral or credit risk mitigation. The principal collateral types for loans and advances are:

- Mortgages over residential properties;
- Charges over business assets such as premises, inventory and accounts receivable; and
- Charges over financial instruments such as debt securities and equities.

Longer-term finance and lending to corporate entities are generally secured; individual credit facilities are generally secured. In addition, in order to authorise the credit loss the Group will seek additional collateral from the counterparty as soon as impairment indicators are noticed for the relevant individual loans and advances.

Collateral held as security for financial assets other than loans and advances is determined by the nature of the instrument. Debt securities, treasury and other eligible bills are generally unsecured.

Notes to Consolidated Financial Statements

3 Financial risk management ...continued

Credit risk...continued

Risk limit control and mitigation policies...continued

Credit-related commitments

The primary purpose of these instruments is to ensure that funds are available to a customer as required. Guarantees and standby letters of credit carry the same credit risk as loans. Documentary and commercial letters of credit – which are written undertakings by the Group on behalf of a customer authorisation a third party to draw drafts on the Group up to a stipulated amount under specific terms and conditions – are authorisations by the underlying shipments of goods to which they relate and therefore carry less risk than a direct loan.

Commitments to extend credit represent unused portions of authorisations to extend credit in the form of loans, guarantees or letters of credit. With respect to credit risk on commitments to extend credit, the Group is pot entially exposed to loss in an amount equal to the total unused commitments. However, the likely amount of loss is less than the total unused commitments, as most commitments to extend credit are contingent upon customers maintaining specific credit standards. The Group monitors the term to maturity of credit commitments because longer-term commitments generally have a greater degree of credit risk than shorter-term commitments.

Impairment and provisioning policies

The internal rating systems described under "credit risk measurement" focus more on credit-quality mapping from the inception of the lending and investment activities. In contrast, impairment provisions are recognised for financial reporting purposes only for losses that have been incurred at the balance sheet date based on objective evidence of impairment. Due to the different methodologies applied, the amount of incurred credit losses provided for in the financial statements are usually lower than the amount determined from the expected loss model that is used for internal operational management and banking regulation purposes.

The impairment provision shown in the balance sheet at year-end is derived from each of the five internal rating grades. However, the majority of the impairment provision comes from the bottom three gradings. The table below shows the percentage of the Group's on-balance sheet items relating to loans and advances and the associated impairment provision for each of the Group's internal rating categories:

Rating	20	010	20	09
	Loans and advances (%)	Impairment provision (%)	Loans and advances (%)	Impairment provision (%)
1 Pass	75.95	35.39	75.36	0.03
2 Special mention	14.16	0.50	16.77	0.24
3 Sub-standard	7.45	31.65	6.35	44.51
4 Doubtful	1.16	21.51	1.17	36.30
5 Loss	1.28	10.95	0.35	18.92

The internal rating tool assists management to determine whether objective evidence of impairment exists under IAS 39, based on the following criteria set out by the Group:

- Delinquency in contractual payments of principal or interest;
- Cash flow difficulties experienced by the borrower (eg equity ratio, net income percentage of sales);
- Breach of loan covenants or conditions;
- Initiation of bankruptcy proceedings;
- Deterioration of the borrower's competitive position; and
- Deterioration in the value of collateral.

Financial risk management ...continued

Credit risk...continued

<u>Impairment and provisioning policies</u>...*continued*The Group's policy requires the review of individual financial assets that are above materiality thresholds at least annually or more regularly when individual circumstances require. Impairment allowances on individually assessed accounts are determined by an evaluation of the incurred loss at balance-sheet date on a case-by-case basis, and are applied to all individually significant accounts. The assessment normally encompasses collateral held (including re-confirmation of its enforceability) and the anticipated receipts for that individual account.

3 Financial risk management ... continued

Credit risk...continued

Maximum exposure to credit risk before collateral held or other credit enhancements...continued
The above table represents a worse case scenario of credit risk exposure to the Group at December 31, 2010
and 2009 without taking account of any collateral held or other credit enhancements attached. For on-balance-sheet assets, the exposures set out above are based on net carrying amounts as reported in the balance sheet.

As shown above, 55% (2009 - 62%) of the total maximum exposure is derived from loans and advances to customers; 10% (2009 - 18%) represents investments in debt securities.

Management is confident in its ability to continue to control and sustain minimal exposure of credit risk to the Group resulting from both its loan and advances portfolio based on the following:

- 90% (2009 92%) of the loans and advances portfolio is categorised in the top two grades of the internal rating system;
- Large corporate customer loans, which represents the biggest group in the portfolio, are backed by collateral;
- 70% (2009 73%) of the loans and advances portfolio are considered to be neither past due nor impaired;
- 27% (2009 13%) of the investments in debt securities and other bills have at least an A- credit rating.

Loans and advances are summarised as follows:

	2010 \$'000	2009 \$'000
Loans and advances to customers		
Neither past due nor impaired	1,251,688	979,223
Past due but not impaired	311,401	257,278
Impaired	206,206	101,657
Gross	1,769,295	1,338,158
Less allowance for impairment losses on loans and advances	(43,913)	(23,331)
Net	1,725,382	1,314,827

The total allowance for impairment losses on loans and advances is \$43,913 (2009 - \$23,331) of which \$39,204 (2009 - \$19,511) represents the individually impaired loans and the remaining amount of \$4,709 (2009 - \$3,820) represents the portfolio provision. Further information of the allowance for impairment losses on loans and advances to customers is provided in Notes 11 and 12.

The credit quality of the portfolio of loans and advances that were neither past due nor impaired can be assessed by reference to the internal rating system adopted by the Group.

Loans and advances individually impaired

The individually impaired loans and advances to customers before taking into consideration the cash flows from collateral held and unearned interest on discount loans is \$219,710 (2009 - \$101,657).

The breakdown of the gross amount of individually impaired loans and advances by class are as follows:

December 31, 2010	Overdrafts \$'000	Term Loans \$'000	Mortgages \$'000	Large Corporate loans \$'000	Total \$'000
Individually impaired loans	2,016	57,148	23,941	123,101	206,206
December 31, 2009		,	,	,	,
Individually impaired loans	6,153	49,256	26,130	20,118	101,657

Loans and advances renegotiated

Restructuring activities include extended payment arrangements, approved external management plans, modification and deferral of payments. Following restructuring, a previously overdue customer account is reset to a normal status and managed together with other similar accounts. Restructuring policies and practices are based on indicators or criteria which, in the judgment of local management, indicate that payment will most likely continue. These policies are kept under continuous review. Restructuring is most commonly applied to term loans, in particular customer finance loans. Renegotiated loans that would otherwise be past due or impaired totaled \$15,153 at December 31, 2010 (2009 - \$7,496).

Repossessed collateral

At the end of 2010 and 2009 the Group had no repossessed collateral.

3 Financial risk management...continued

Market risk

The Group takes on exposure to market risks, which is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risks arise from open positions in interest rate and equity products, all of which are exposed to general and specific market movements and changes in the level of volatility of market rates or prices such as interest rates, credit spreads, foreign exchange rates and equity prices. The Group's exposure to market risks arises from its non-trading portfolios.

Non-trading portfolios primarily arise from the interest rate management of the Group's retail and commercial banking assets and liabilities. Non-trading portfolios also consist of equity risks arising from the Group's available-for-sale investments.

Currency risk

The Group takes on exposure to effects of fluctuations in the prevailing foreign currency exchange rates on its financial position and cash flows. The Board of Directors sets limits on the level of exposure by currency and in total for both overnight and intra-day positions, which are monitored daily. The Group's exposure to currency risk is minimal since most of its assets and liabilities in foreign currencies are held in United States dollars. The exchange rate of the Eastern Caribbean dollar (EC\$) to the United States dollar (US\$) has been formally pegged at EC\$2.70 = US\$1.00 since 1974. The following table summarises the Group's exposure to foreign currency exchange rate risk at December 31.

Interest rate risk

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. The Group takes on exposure to the effects of fluctuations in the prevailing levels of market interest rates on both fair value and cash flows risks. Interest margins may increase as a result of such changes but may reduce or create losses in the event that unexpected movements arise. The Board of Directors sets limits on the level of mismatch of interest rate repricing that may be undertaken.

The table below summarises the Group's exposure to interest rate risks. Included in the table are the Group's financial assets and liabilities at carrying amounts, categorized by the earlier of contractual repricing or maturity dates

Interest rate risk...continued

The table below summarises the effective interest rate by major currencies for monetary financial instruments not carried at fair value through profit or loss:

	EC\$ %	US\$ %	EURO %	GBP %	CAD %
At December 31, 2010					
Assets					
Treasury bills	5.7	_	_	_	_
Deposits with other banks	4.1	3.8	2.8	_	0.4
Loans and receivables:					
- loans and advances to customers	9.0	7.0	_	_	_
- bonds	7.3	_	_	_	_
Investment securities:					
- held-to-maturity	5.5	8.5	_	_	_
- available for sale	6.1	5.9	2.6	3.1	_
Liabilities					
Due to customers	3.1	2.7	0.3	0.4	0.1
Borrowings	6.1	3.8	-	_	-

The Group's fair value interest rate risk arises from debt securities classified as available for sale. At December 31, 2010 if market interest rates had been 0.5% higher/lower with all variables held constant, comprehensive income for the year would have been \$35 (2009 – \$55) higher/lower as a result of the decrease/increase in fair value of available-for-sale debt securities.

Cash flow interest rate risk arises from loans and advances to customers at variable rates. At December 31, 2010 if variable interest rates had been 0.5% higher/lower with all other variables held constant, post-tax profit for the year would have been \$4,227, (2009 - \$3,458) higher/lower, mainly as a result of higher/lower interest income on variable rate loans.

3 Financial risk management...continued

Liquidity risk

Liquidity risk is the risk that the Group is unable to meet its obligations when they fall due as a result of customer deposits being withdrawn, payment of cash requirements from contractual commitments, or other cash outflows.

The Group is exposed to daily cash calls on its available cash resources from overnight deposits, current accounts, maturing deposits, loan draw-downs, and guarantees. The Group does not maintain cash resources to meet all of these needs, as experience shows that a minimum level of reinvestment of maturing funds can be predicted with a high level of certainty. The Board of Directors sets limits on the minimum proportion of maturing funds available to meet such calls and on the minimum level of interbank and other borrowing facilities that should be in place to cover withdrawals at unexpected levels of demand.

Liquidity risk management process

The matching and controlled mismatching of the contractual maturities and interest rates of assets and liabilities is fundamental to the management of the Group. It is unusual for banks to be completely matched as transacted business is often of uncertain term and of different types. An unmatched position potentially enhances profitability, but also increases the risk of losses.

The contractual maturities of assets and liabilities and the ability to replace, at an acceptable cost, interest-bearing liabilities as they mature, are important factors in assessing the liquidity of the Group and its exposure to changes in interest rates and exchange rates.

Liquidity requirements to support calls under guarantees and standby letters of credit are considerably less than the amount of the commitment because the Group does not generally expect the third party to draw funds under the agreement. The total outstanding contractual amount of commitments to extend credit does not necessarily represent future cash requirements, since many of these commitments will expire or terminate without being funded.

Funding approach

Sources of liquidity are regularly reviewed to maintain a wide diversification by currency, geography, provider, product and term.

Non-derivative cashflows

The table below presents the cash flows payable by the Group under non-derivative financial liabilities and assets held for managing liquidity risk by remaining contractual maturities at the balance sheet date. The amounts disclosed in the table are the contractual undiscounted cash flows, whereas the Group manages the liquidity risk based on expected undiscounted cash inflows.

<u>Assets held for managing liquidity risk</u>
The Group holds a diversified portfolio of cash and investment securities to support payment obligations.

The Group's assets held for managing liquidity risk comprise cash and balances with central banks, certificate of deposits, government bonds that are readily acceptable in repurchase agreements, treasury and other eligible bills, loans and advances to financial institutions, loans and advances to customers and other items in the course of collection.

The Group would also be able to meet unexpected net cash outflows by selling investment securities and accessing additional funding sources.

Total	67,048	102,756	169,804

(c) Capital commitments

Capital commitments are due within one year see (Note 46)

Fair values of financial assets and liabilities

Fair value amounts represent estimates of the consideration that would currently be agreed upon between knowledgeable willing parties who are under no compulsion to act and is best evidenced by a quoted market value, if one exists. The following methods and assumptions were used to estimate the fair value of financial instruments.

The fair values of cash resources, other assets and liabilities, cheques and other items in transit and due to other banks are assumed to approximate their carrying values due to their short term nature. The fair value of off-balance sheet commitments are also assumed to approximate the amounts disclosed in Note 46 due to their short term nature.

Due to customers

The estimated fair value of deposits with no stated maturity, which includes non-interest bearing deposits, is the amount repayable on demand. Deposits payable on a fixed date at rates which reflect market conditions and are assumed to have fair values which approximate carrying value.

Investment securities

Investment securities include only interest bearing assets held to maturity; assets classified for sale are measured at fair value.

Notes to Consolidated Financial Statements

December 31, 2010

(in thousands of Eastern Caribbean dollars)

3 Financial risk management...continued

Fair values of financial assets and liabilities...continued

Loans and advances

Loans and advances are net of provisions for impairment. The estimated fair values of loans and advances represent the discounted amount of estimated future cashflows expected to be received. Expected cashflows are discounted at current market rates to determine fair value.

The table below summarises the carrying amounts and fair values of those financial assets and liabilities not presented on the Group's balance sheet at their fair value.

	Carrying	value	Fair val	lue

Fair value hierarchy

IFRS 7 specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources; unobservable inputs reflect the Group's market assumptions. These two types of inputs have created the following fair value hierarchy:

- Level 1 Quoted prices (unadjusted) in active markets for identical assets or liabilities. This level includes listed equity securities and debt instruments on exchanges such as Luxembourg, New York and Trinidad and Tobago.
- Level 2 Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 inputs for the asset or liability that are not based on observable market data (unobservable inputs). This level includes equity investments and debt instruments with significant unobservable components.

This hierarchy requires the use of observable market data when available. The Group considers relevant and observable market prices in its valuations where possible.

Capital management

The Group's objectives when managing capital, which is a broader concept than the 'equity' on the face of balance sheets, are:

- To comply with the capital requirements set by the regulators of the banking markets where the entities within the Group operate;
- To safeguard the Group's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders; and
- To maintain a strong capital base to support the development of its business.

Capital adequacy and the use of regulatory capital are monitored daily by the Group's management, employing techniques based on the guidelines developed by the East Caribbean Central Bank the Authority for supervisory purposes. The required information is filed with the Authority on a quarterly basis.

The Authority requires each bank or banking group to: (a) hold the minimum level of the regulatory capital to the risk-weighted asset (the 'Basel capital adequacy ratio') at or above the internationally agreed minimum of 8%.

The Group's regulatory capital as managed by its Treasury is divided into two tiers:

- Tier 1 capital: share capital (net of any book values of the treasury shares), minority interests arising on consolidation from interests in permanent equity, retained earnings and reserves created by appropriations of retained earnings. The book value of goodwill is deducted in arriving at Tier 1 capital; and
- Tier 2 capital: qualifying subordinated loan capital, collective impairment allowances, unrealised gains arising on the fair valuation of equity instruments held as available for sale and fixed asset revaluation reserves (limited to 20% on Tier 1 capital).

Notes to Consolidated Financial Statements

December 31, 2010

(in thousands of Eastern Caribbean dollars)

3 Financial risk management...continued

Capital management...continued

Investment in associates are deducted from Tier 1 and Tier 2 capital to arrive at the regulatory capital.

The risk-weighted assets are measured by means of a hierarchy of five risk weights classified according to the nature of – and reflecting an estimate of credit, market and other risks associated with each asset and counterparty, taking into account any eligible collateral or guarantees. A similar treatment is adopted for off-balance sheet exposure, with some adjustments to reflect the more contingent nature of the potential losses.

The table below summarises the composition of regulatory capital and the ratios of the Group for the years ended December 31. During those two years, the Group enities complied with all of the externally imposed capital requirements to which they are subject.

	2010 \$'000	2009 \$'000
Tier 1 capital		
Share capital	170,081	168,831
General bank reserves	57,944	59,086

Fiduciary activities

The Group provides investment management and advisory services to third parties, which involve the Group making allocation and purchase and sale decisions in relation to a wide range of financial instruments. Those assets that are held in a fiduciary capacity are not included in these financial statements. Some of these arrangements involve the Group accepting targets for benchmark levels of returns for the assets under the Group's care. These services give rise to the risk that the Group will be accused of maladministration or under-performance. At the balance sheet date, the Group had financial assets under administration amounting to \$46,362 (2009 - \$35,583).

Insurance risk

The risk under any one insurance contract is the possibility that the insured event occurs and the uncertainty of the amount of the resulting claim. By the very nature of an insurance contract, this risk is random and therefore unpredictable.

For a portfolio of insurance contracts where the theory of probability is applied to pricing and provisioning, the principal risk that the Group faces under its insurance contracts is that the actual claims and benefits payments exceeds the carrying amount of the insurance liabilities. This could occur because of the frequency or severity of claims and benefits are greater than estimated. Insurance events are random and the actual number and the amount of claims and benefits will vary from year to year from the estimate established.

Experience shows that the larger the portfolio of similar contracts, the smaller the relative variability about the expected outcome will be. In addition, a more diversified portfolio is less likely to be affected across the board by a change in any subset of the portfolio. The Group has developed its insurance underwriting strategy to diversify the type of insurance risks accepted and within each of these categories to achieve a sufficiently large population of risks to reduce the variability of the expected outcome.

Factors that aggravate insurance risk include lack of risk diversification in terms of type and amount of risk, geographic location and type of industry covered.

General insurance contracts

(a) Frequency and severity of claims

For general insurance contracts, climatic changes give rise to more frequent and severe extreme weather events (for example, river flooding, hurricanes, etc.) and their consequences (for example, subsidence claims).

The Group has the right to re-price the risk on renewal. It also has the ability to impose deductibles and reject fraudulent claims. These contracts are underwritten by reference to the commercial replacement value of the properties and contents insured, and claim payments limits are always included to cap the amount payable on occurrence of the insured event. Cost of rebuilding properties, of replacement indemnity for contents and time taken to restart operations for business interruption are the key factors that influence the level of claims under these policies. The greatest likelihood of significant losses on these contracts arises from storm or flood damage. The Group has reinsurance cover for such damage to limit losses.

General insurance contracts are subdivided into four risk groups: fire, business interruption, weather and property damage and theft. The Group does not underwrite property insurance contracts outside of St. Lucia.

(b) Source of uncertainty in the estimation of future claim payments

The development of large losses/catastrophes is analysed separately. The Group's estimation process reflects all the factors that influence the amount and timing of cash flows from these contracts. The shorter settlement period for these claims allows the Group to achieve a higher certainty about the estimated cost of claims.

Notes to Consolidated Financial Statements **December 31, 2010**

4 Critical accounting estimates, and judgements in applying accounting policies

The Group makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Impairment losses on loans and advances

The Group reviews its loan portfolio to assess impairment at least annually. In determining whether an impairment loss should be recorded in the consolidated statement of income, the Group makes judgements as to whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of loans before the decrease can be identified with an individual loan in that portfolio. To the extent that the net present value of estimated cashflows differs by +/-5%, the provision would be estimated at \$2,069 (2009 - \$2,209) lower or higher.

Impairment of available-for-sale equity investments

The Group determines that available-for-sale equity investments are impaired when there has been a significant or prolonged decline in the fair value below its cost. This determination of what is significant or prolonged requires judgement. In making this judgement, the Group evaluates among other factors, the normal volatility in share price. In addition, impairment may be appropriate when there is evidence of deterioration in the financial health of the investee, industry and sector performance, changes in technology and operational and financing cash flows.

Had all the declines in fair value below cost been considered significant or prolonged, the Group would suffer an additional \$544 (2009 - \$3,757) loss in its financial statements, being the transfer of the fair value reserve to the statement of income.

Held-to-maturity investments

The Group follows the guidance of IAS 39 on classifying non-derivative financial assets with fixed or determinable payments and fixed maturity as held-to-maturity. This classification requires significant judgement. In making this judgement, the Group evaluates its intention and ability to hold such investments to maturity. If the Group fails to keep these investments to maturity other than for the specific circumstances – for example, selling an insignificant amount close to maturity – it will be required to reclassify the entire class as available for sale. The investments would therefore be measured at fair value not amortised cost. If the entire held-to-maturity investments are tainted, the fair value would increase by \$1,498 (2009 - \$1,551) with a corresponding entry in the fair value reserve in equity.

Retirement benefits

The present value of the retirement benefit obligations depends on a number of factors that are determined on an actuarial basis using a number of assumptions. Any changes in these assumptions will impact the carrying amount of pension obligations. The assumptions used in determining the net cost (income) for pensions include the discount rate. The Group determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the Group considers the interest rates of Government that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating the terms of the related pension liability. Other key assumptions for pension obligations are based in part on current market conditions. Were the discount rate used to increase/(decrease) by 1% from management's estimates, the defined benefit obligation for pension benefits would be an estimated \$4,136 lower or \$5,866 higher.

5 Segment analysis

In the financial year 2010, segment reporting by the Group was prepared in accordance with IFRS 8, 'Operating segments'.

Following the management approach of IFRS 8, operating segments are reported in accordance with the internal reporting provided to the Company's Board of Directors (the chief operating decision-maker), which is responsible for allocating resources to the reportable segments and assessing their performance.

The Group has two operating segments which meet the definition of reportable segment under IFRS 8. They comprise:

- Domestic banking incorporating private banking services, private customer current accounts, savings, deposits, investment savings products, custody, credit and debit cards, consumer loans and mortgages, overdrafts, foreign currency and derivative products, financial instruments trading, structured financing, corporate leasing, and merger and acquisitions advice.
- Other group operations comprise General Insurance, Offshore banking, Property development & management and Capital market activities/Merchant Banking none of which constitutes a separately reportable segment and business activities from head office.

The segment disclosures for 2009 have been restated to reflect the manner in which the internal reporting is provided to the Board of Directors.

The Group's segment operations are all financial with a majority of revenues being derived from interest and the Company's Board of Directors relies primarily on net interest revenue to assess the performance of the segment, the total interest income and expense for all reportable segments is presented on a net basis.

The revenue from external parties reported to the Company's Board of Directors is measured in a manner consistent with that in the consolidated statement of income.

Revenue-from external customer is recorded as such and can be directly traced to each business segment.

The Group's management reporting is based on a measure of operating profit comprising net interest income, loan impairment charges, net fee and commission income, other income and non-interest expenses. This measurement basis excludes the effects of non-recurring expenditure from the operating segments such as restructuring costs, legal expenses and goodwill impairments when the impairment is the result of an isolated, non-recurring event. As the Company's Board of Directors reviews operating profit, the results of discontinued operations are not included in the measure of operating profit.

The information provided about each segment is based on the internal reports about segment profit or loss, assets and other information, which are regularly reviewed by the Company's Board of Directors.

Segment assets and liabilities comprise operating assets and liabilities, being the majority of the consolidated balance sheet.

Revenue and non - current assets are primarily in Saint Lucia.

There were no revenues deriving from transactions with a single external customer that amount to 10% or more of the Group's revenue.

16 Investment in associates and joint venturescontinued

The investment associates and joint ventures are as follows:

	2010 \$'000	2009 \$'000
Associate		
At beginning of year Additions Share of loss in associate	5,929 7,000 (647)	6,433 - (504)
At end of year	12,282	5,929

During the year the Group invested \$200 and maintained its shareholding of 33 1/3 in Blue Coral Limited. The Group's interest in its associate, Blue Coral Limited, an unlisted company incorporated in St. Lucia, is as follows:

Year	Assets	Liabilities	Revenues	Interest held
	\$'000	\$'000	\$'000	%
2010	51,822	39,968	1,035	33½
2009	50,702	35,492	1,235	33½

During the year the Group invested \$6,800 and obtained a 28% shareholding in the newly incorporated East Caribbean Amalgamated Bank Limited of Antigua. The company is an unlisted company incorporated in St. Kitts. This undertaking represented the Group's contribution to a joint initiative of indigenous banks of the East Caribbean Currency Union to salvage and restructure the previous Bank of Antigua Limited.

The Group's interest in its associate East Caribbean Amalgamated bank Limited of Antigua, is as follows:

Year	Assets \$'000	Liabilities \$'000	Revenues \$'000	Interest held %
2010	400,024	325,726	4,125	28
			2010 \$'000	2009 \$'000
Joint Venture At beginning of year Disposals during the year			433 (50)	433
At end of year			383	433

The Group has a 62% (2009 - 70%) interest held in its joint venture Angelwood Limited. The company is an unlisted company incorporated in St. Lucia. The company has not engaged in any business activity for the years ended December 31.

End of year	33,011	28,717

Notes to Consolidated Financial Statements

December 31, 2010

(in thousands of Eastern Caribbean dollars)

22 Retirement benefit asset...continued

The amounts recognised in the consolidated statement of income are as follows:

	2010	2009
	\$'000	\$'000
Current service cost	1,476	1,369
Interest cost	1,922	1,769
Expected return on plan assets	(1,785)	(1,565)
Past service cost	_	_
Net actuarial losses recognised in the year	(124)	274
	1,489	1.847

The actual return on plan assets was \$2,217 (2009 - \$1,696).

The principal actuarial assumptions used were as follows:

	2010 %	2009 %
Discount rate Expected return on plan assets Future promotional salary increases Future inflationary salary increases	7.00 6.00 3.00 3.00	7.50 6.00 3.50 3.00

No allowance has been made for future pension increases. Assumptions are set to approximate the expected average rates over the long term and may not be appropriate in any specific year.

Plan assets allocation is as follows:

	2010 %	2009 %
Debt securities Equity securities Other	89 2 9	84 3 13
	100	100

The pension plan assets do not include assets or ordinary shares of the Group.

Notes to Consolidated Financial Statements

December 31, 2010

(in thousands of Eastern Caribbean dollars)

22 Retirement benefit asset...continued

Mortality rate

Assumptions regarding future mortality experience are set based on advice, published statistics and experience in each territory.

The average life expectancy in years of a pensioner retiring at age 60 after the balance sheet date is as follows:

	2010	2009
Male	17.84	17.84
Female	21.27	21.27

The assumption adopted for the expected return on assets considers the actual assets the Plan holds and the outlook for returns on various asset classes. This assumption is usually derived by looking at actual asset mix and making assumptions about returns relative to the "baseline" of the plan's discount rate, which are taken to be the returns on government bonds.

Expected contributions to post-employment benefit plans was \$1,580 (2009 - \$1,541).

	2010	2009	2008	2007	2006
	\$'000	\$'000	\$'000	\$'000	\$'000

	2010 \$'000	2009 \$'000
(a) General	74 (00	46.564
At beginning of year	51,600	46,564
Transferred (to)/ from retained earnings	(1,716)	3,511
Transferred from contributed capital	_	1,525
At end of year	49,884	51,600

It is the policy of the Group to maintain a general reserve for reinvestment in operations. Transfers to the reserve are based on a maximum of 35% of the consolidated Group's profit for the year after transfers to statutory reserve.

	2010 \$'000	2009 \$'000
(b) Statutory At beginning of year Transferred from retained earnings	80,306 4,108	70,408 9,898
At end of year	84,414	80,306

Pursuant to Section 14(1) of the Banking Act of St. Lucia No. 34 of 2006, the Bank institutions shall, out of its net profits of each year transfer to that reserve a sum equal to not less than twenty percent of such profits whenever the amount of the fund is less than one hundred percent of the paid-up capital of the Banking institutions.

	2010 \$'000	2009 \$'000
(c) Student loan guarantee fund At beginning of year Transferred from retained earnings	2,335 371	1,996 339
	2,706	2,335

Notes to Consolidated Financial Statements

December 31, 2010

(in thousands of Eastern Caribbean dollars)

31 Reservescontinued

This is a non-distributable reserve. Transfers are made to the reserve at an amount equal to the net profit of the subsidiary Student Loan Guarantee Fund Limited.

	2010 \$'000	2009 \$'000
(d) Special At beginning of year Transferred from retained earnings	1,684 114	1,536 148
At end of year	1,798	1,684

The finance contract between the European Investment Bank ("EIB") and the former St. Lucia Development Bank, now assumed by Bank of Saint Lucia Limited, requires the institution to establish and maintain a special reserve. Annually, an amount as specified under Section 6.05 of the Contract is credited to the reserve.

	2010 \$'000	2009 \$'000
(e) Retirement benefit At beginning of year Transferred from/(to) retained earnings	3,467 89	3,800 (333)
At end of year	3,556	3,467

The retirement benefit reserve is a non-distributable reserve. It is the Group's policy to match the amount of fair value of retirement plan assets with the retirement benefit reserve. Any difference is charged to retained earnings.

33 Related party transactions and balances

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party by making financial and operational decisions.

Interest income and interest expense with related parties were as follows:

	2010)	2009	
	Income \$'000	Expense \$'000	Income \$'000	Expense \$'000
Government of Saint Lucia	_	1,500	_	4,692
Statutory bodies	3,199	10,026	3,320	10,401
Directors and key management	451	179	341	140

Related party balances with the Group were as follows:

	2010		2009	
	Loans \$'000	Deposits \$'000	Loans \$'000	Deposits \$'000
Government of Saint Lucia	_	162,906	_	133,775
Statutory bodies	37,500	280,459	39,580	250,225
Directors and key management	9,026	6,099	7,325	2,554

No provisions have been recognised in respect of loans given to related parties.

The loans issued to directors and other key management personnel during the year are repayable monthly over an average of 5 years and have a weighted average effective interest rates of 5.7% (2009 - 6.5%). The secured loans advanced to the directors during the year are collateralised by mortgages over residential properties.

43 Income tax expense

income tax expense	2010 \$'000	2009 \$'000
Current tax Prior year tax Deferred tax (recovered)/charged (Note 27)	952 1,474 (5,665)	3,798 9,464 459
	(3,239)	13,721

Tax on the Group's profit before income tax differs from the theoretical amount that would arise using the statutory tax rate of 30% as follows:

	2010 \$'000	2009 \$'000
Profit for the year before income tax	6,451	39,819
Tax calculated at the applicable tax rate of 30% Tax effect of income not subject to tax Deferred tax asset unrecognised Prior year under provision of deferred tax Tax effect of expenses not deductible for tax purposes Under provision of income tax Tax losses expired	1,935 (9,562) 182 (494) 2,956 1,474 270	11,946 (8,357) 2 - 649 9,464 17
	(3,239)	13,721

The Group has unutilised tax losses of \$25,037 (2009 - \$5,291). Unutilized tax losses may be carried forward and deducted against 50% of future taxable income within six years following the year in which the losses were incurred. Tax losses expire in 2013. The losses are based on income tax returns, which have not yet been assessed by the Inland Revenue Department.

Tax Assessment for income year 2009 with respect to the Bank of Saint Lucia has been issued and agreed by the Inland Revenue Department. The results of the assessment indicated that a tax payable of \$1,474 was due. This adjustment has been reflected in the current year. The basis for allocating expenses relating to exempt income of the development operations of the Company for year ended December 31, 2009 has been agreed by the Inland Revenue Department.

There was no income tax effect relating to components of other comprehensive income.

44 Earnings per share

Basic

The calculation of basic earnings per share is based on the profit attributable to ordinary shareholders of \$9,231 (2009 - \$25,560) and 24,423,922 (2009 - 24,173,922) shares, being the weighted average number of ordinary shares in issue in each year. For the purpose of calculating basic earnings per share, the profit for the year attributable to ordinary shares is the profit for the year after deducting preference dividends of \$291 (2009 - \$378).

Diluted

The calculation of diluted earnings per share is based on the profit attributable to ordinary shareholders of \$9,231 (2009 - \$25,560) and 25,253,922 (2009 - 25,253,922) shares, being the weighted average number of shares in issue taking into account the preference shares had they been converted to ordinary shares. For the purpose of calculating diluted earnings per share, the profit for the year attributable to ordinary shares is the profit for the year after deducting preference dividends of \$291 (2009 - \$378).

45 Cash and cash equivalents

For the purposes of the statement of cash flow, cash and cash equivalents comprise the following balances:

	2010 \$'000	2009 \$'000
Cash and balances with Central Bank (Note 6)	103,505	8,744
Treasury bills (Note 7)	6,601	6,292
Deposits with other banks (Note 8)	642,480	192,987
Financial assets held for trading (Note 9)	9,842	86,672
Deposits with non-bank financial institutions (Note 10)	2,320	2,503
	764,748	297,198

46 Contingent liabilities and commitments

Commitments

The following table indicates the contractual amounts of the Group financial instruments that commit it to extend credit to customers.

	2010 \$'000	2009 \$'000
Loan commitments Financial guarantees and other financial facilities	141,524 128,355	107,684 62,120
	269,879	169,804

Capital Commitment

Capital expenditure contracted for at the end of the reporting period but not yet incurred for construction of buildings is \$17,079.

48 Business combinations

On November 1, 2010 the Group acquired 51% of the share capital of NCB St Vincent Limited (subsequently re-named Bank of St. Vincent & the Grenadines Ltd). This acquisition is in accordance with the Group's policy to diversify its operations within the Caribbean Region.

The acquisition gave rise to a Residual Purchase Consideration of \$2,110 being the excess of the fair value of the Net Assets acquired over the purchase consideration. The entire purchase consideration was transacted in Cash. The resultant gain arising on acquisition which arose out of the excess has been credited to the statement of income in other gains.

The following table summarises the consideration paid for NCB St Vincent Limited (subsequently re-named Bank of St. Vincent & the Grenadines Ltd) and the amounts of the assets acquired and liabilities assumed recognised at the acquisition date as well as the fair value at the acquisition date of the non controlling interest:

Consideration at November 1, 2010

	\$'000
Cash consideration transferred	42,000
Acquisition related costs (included in administrative expenses in the consolidated statement of income for December 31,2010)	39
Recognised amounts of identifiable assets acquired and liabilities assumed Cash Loans and Advances to Customers Investment Properties Investment Securities Pledged Assets Other Assets Property, Plant & Equipment Computer Software Core Deposit Intangible	64,009 465,681 37,000 112,341 7,369 12,522 25,447 2,645 7,793

Total Liabilities	648,318
Total identified net assets at fair value	86,489
Non-controlling interest Residual Purchase Consideration	(42,379) (2,110)
	42,000

Notes to Consolidated Financial Statements

December 31, 2010

(in thousands of Eastern Caribbean dollars)

48 Business combinations...continued

The underlying contractual arrangements for the acquisition contain no provisions for any form of indemnification of the selling shareholder.

The fair value of loans and advances to customers was \$465,681. The fair value of the contractual amount of loans and at advances at gross was to \$472,105 of which \$6,424 is expected to be uncollectible.

The non-controlling interest in the acquiree was recognised at the non-controlling interest's proportionate share of the acquiree's net assets.

The income and profit included in the consolidated statement of income since November 1, 2010 contributed by NCB St Vincent Limited (subsequently re-named Bank of St. Vincent & the Grenadines Ltd) was \$11,228 and \$5,196 respectively.

49 Subsequent events

Final dividends are not accounted for until they have been approved at the Annual General Meeting. At the meeting on May 17, 2011, the Board of Directors proposed a final dividend in respect of 2010 of 15 cents per share for ordinary shares held by shareholders on record as of June 1, 2011.

The financial statements at December 31, 2010 do not reflect this resolution which will be accounted for in equity as an appropriation of retained profits in the year ending December 31, 2011.
