Discussions of liquidity and capital resources may be combined whenever the two topics are interrelated. Discussion of material changes should be from the end of the preceding financial year to the date of the most recent interim quarterly report.

This section should be completed as per instructions for completing the MD&A.

Liquidity:

The Group's liquidity levels remained very strong in the First Quarter of 2014 reflecting continuing customer confidence. There was a small, seasonal reduction in cash held by the offshore bank but this was partially offset by increases in cash reserve balances at both of the Group's domestic banks (Bank of Saint Lucia Limited and Bank of Saint Vincent and the

Grenadines Limited). No dramatic changes in the levels of liquidity are anticipated in the near future.

Capital Resources:

The Group's Capital Ratios have strengthened since December 2013 reflecting profits earned by all three banking subsidiaries and an improvement in the market values of investments. There are no material commitments for capital expenditure other than commitments related to the normal expenditure of running the business.

Results of Operation:

The ECFH Group recorded above Budget pre-tax income of \$7.7M for the First Quarter of 2014. The primary focus remains obtaining maximum recovery on the previously provisioned non-performing loan portfolio of Bank of Saint Lucia Limited and to this end some progress is being made on the disposal of collateral securing the largest of these loans. Management is also directing attention towards ensuring collection of payments on performing loans to ensure that transfers to the non-performing classification can be minimised in the future and towards ensuring that there is clear guidance on the levels of risk acceptable to the Group in its future lending activities.

3. Disclosure of Risk Factors.

Provide a discussion of the risk factors that may have an impact on the results from operations or on the financial conditions. Avoid generalised statements and only include factors that are unique to the company. Typical risk factors include untested products, cash flow and liquidity problems, dependence on a key supplier or customer, management inexperience, nature of business, absence of a trading market (specific to the securities of the reporting issuer), etc. Indicate if any risk factors have increased or decreased in the time interval between the previous and current filing.

The ECFH Group continued to face challenges during the first quarter of 2014 on both the international and domestic landscapes. However, the Group seems to be weathering the turbulent times and recorded improved earnings as compared to the same period of the previous year

The significant risks to which the Group is exposed include credit risk, liquidity risk, market risk, operational risk, foreign exchange risk, and reputation risk. The Group ensures that risk mitigation in any one area does not inadvertently increase exposure in other areas.

Credit Risk

Credit risk is determined to be the largest single risk faced by the ECFH Group. At March 31, 2014, credit activity (loans and investments) amounted to approximately 69% of total assets as compared 65% at the end of the end of the previous quarter i.e. December 31, 2013

During the period under review, the Group continued to monitor the quality of loans being approved, conducting credit risk reviews on all lending over a stipulated dollar value and analysis on loans approved to ensure general compliance with approved credit risk management guidelines. Reviews of the quality and performance of the credit portfolio are undertaken on a regular basis to identify trends and concentrations and take corrective action as necessary. The Recoveries Committee continuously monitors and reviews delinquency levels.

The ratio of non-productive loans to total loans increased significantly at March 31, 2014 when compared to the position as at December 31, 2013. Significant efforts have been made to reduce the non-productive portfolio including work-outs, write-off, sale of selective non-performing loans and receiverships. While the ECFH Group continues to work with its client through these difficult times, the deceleration in economic activity will make it difficult to contain the growth in the non-productive portfolio in the next 12 months.

Market Risk

The Group is stepping up its efforts to manage market risks. To improve its management of market risk, the ECFH Risk Management and Compliance Services is using a financial risk simulation model to assess market and liquidity risk and to provide stress testing scenarios. Currently, the model focuses only on Bank of Saint Lucia Limited but it is the intention to expand the financial risk simulation model to include other subsidiaries of the ECFH Group.

Additionally, the portfolio of investments is continually monitored for changes in value of instruments and circumstances of institutions with which the Group conducts business. Investments are subject to market valuations where appropriate and instruments are marked to market in keeping with IFRS.

Foreign Exchange Risk

Growth in the offshore banking area has resulted in an increase in the number of foreign currencies being managed which means increased exposure to foreign exchange risk. Foreign exchange exposure is monitored on a regular basis by the respective business units as well as the Asset Liability Committee. There were no instances of unmanaged significant exposure during the period under review.

Operational Risk

The Risk Management and Compliance Services have begun the process of developing and documenting a risk register for the ECFH Group. This exercise will make enterprise risk management more structured and effective throughout the ECFH group.

The Group complies with all Anti Money Laundering acts and other related laws in all jurisdictions that the Group has a business presence. Plans are well advanced to stage an AML month to increase the level of awareness of the laws and challenges faced regarding AML.

Liquidity Risk

The Group's liquidity risk is monitored on a regular basis by the Internal Liquidity Committee and the Group Asset/Liability Committee. The Internal Liquidity Committee meets on a more frequent basis than the ALCO to monitor and better manage the Group's liquidity.

Careful liquidity management ensures that the regulatory reserve requirement is always met by the domestic bank and that Capital Adequacy Ratios remain above minimum levels. The Liquidity policy and associated liquidity contingency plans are in place.

Reputation Risk

Reputation risk is the risk that negative publicity regarding the Group's business practices will lead to a loss of revenue or litigation. The Group's reputation; particularly the trust afforded it by customers and counterparties can be irrevocably tarnished due to perceived or real breaches in its ability to conduct business securely and responsibly. In addition, the ECFH Group is responsible for risks associated with the activities of third-party service providers with which they contract.

All risks impact on reputation; therefore, maintaining reputation involves appropriately identifying, analyzing and managing risks that can adversely impact the Group's business. The Group continued to meet its corporate social responsibility encompassing involvement in local communities, employment practices, impact on the environment and sustainable economic and social development, while maintaining strong relationships with business partners. The Group has developed and adheres to a robust Anti-Money Laundering/Anti -Terrorist Financing policy as well as Corporate Governance policy for the Group. In developing these policies, best international practices were used. The Group has a very solid reputation and reputable image in the market place.

A legal proceeding need only be reported in the ECSRC - Q filed for the quarter in which it first became a reportable event and in subsequent quarterly reports in which there have been material developments.
