Discussions of liquidity and capital resources may be combined whenever the two topics are interrelated. Discussion of material changes should be from the end of the preceding financial year to the date of the most recent interim quarterly report.

This section should be completed as per instructions for completing the MD&A.

Liquidity:

The Group's liquidity levels continued to be very strong in the 1st Quarter of 2015. The liquidity of both of the Group's domestic banking subsidiaries, Bank of Saint Lucia Limited and Bank of Saint Vincent and the Grenadines Limited remained at high levels, pushing the Group's Total Assets up to over EC\$4 Billion for the first time. Furthermore, the Group's offshore banking

subsidiary continued to attract large deposits. Liquidity levels demonstrate continued customer confidence in the Group.

Capital Resources:

The Group's Capital Ratios improved marginally in Q1 of 2015, reflecting profits in all trading subsidiaries. Group Capital also benefited from unrealised gains on internationally traded investments caused by increased market values. There are no material commitments for capital expenditure other than commitments related to the normal expenditure of running the business.

Results of Operation:

The ECFH Group enjoyed a profitable 1st Quarter of 2015. The primary focus remains obtaining maximum recovery on the previously provisioned non-performing loan portfolio of Bank of Saint Lucia Limited. The Bank's Loans to Deposits ratio remains well within prudential guidelines. Management also continues to direct attention towards ensuring collection of payments on performing loans to ensure that transfers to the non-performing classification can be minimised in the future and towards ensuring that there is clear guidance on the levels of risk acceptable to the Group in its future lending activities. All of this ties in with the Group's "safe and sound" strategy. The Group has suffered reduced income due to poor demand for loans and the continuing low interest rate environment which has affected investment income but continuing cost reductions (both cost of funds and operational costs) have assisted in partially offsetting the impact of this. The 3 Year Strategic Plan was approved by the Group's Board and the roll-out of related initiatives to staff has begun, together with the definition of a new Group vision statement for ECFH.

3. Disclosure of Risk Factors.

Provide a discussion of the risk factors that may have an impact on the results from operations or on the financial conditions. Avoid generalised statements and only include factors that are unique to the company. Typical risk factors include untested products, cash flow and liquidity problems, dependence on a key supplier or customer, management inexperience, nature of business, absence of a trading market (specific to the securities of the reporting issuer), etc. Indicate if any risk factors have increased or decreased in the time interval between the previous and current filing.

The significant risks to which the Group is exposed include credit risk, liquidity risk, market risk, operational risk, foreign exchange risk, and reputation risk. The Group ensures that risk mitigation in any one area does not inadvertently increase exposure in other areas.

Credit Risk

During the period under review, the quality of loans approved were monitored, credit risk reviews were conducted on all lending over a stipulated dollar value and loans approved were analysed to ensure general compliance with approved credit risk management guidelines. Reviews of the quality and performance of the credit portfolio were undertaken by the Asset Liability Committee to identify trends and concentrations and take corrective action as necessary.

The level of non-productive loans to total loans continued to be challenging during the period under review. Significant efforts have been made to reduce the non-productive portfolio including work-outs, write-off, sale of select non-performing loans and receiverships. It is anticipated that the delinquency levels of BOSL will improve significantly during 2015.

Market Risk

The Group is stepping up its efforts to manage market risks. To improve its management of market risk, the Group is using a financial risk simulation model to assess market and liquidity risks and to analyse various stress testing scenarios. Currently, the model focuses on the two largest banking institutions in the Group, Bank of Saint Lucia Limited and Bank of Saint Vincent and the Grenadines. It is the intention to expand the financial risk simulation model to include other subsidiaries of the ECFH Group.

Foreign Exchange Risk

Growth in the offshore banking area has resulted in an increase in the number of foreign currencies being managed which means increased exposure to foreign exchange risk. Foreign exchange exposure is monitored on a regular basis by the respective business units as well as the Asset Liability Committee. There were no instances of unmanaged exposures during the period under review.

Operational Risk

The Risk Management and Compliance Services have begun the process of developing and documenting a risk register for the ECFH Group. This exercise will make enterprise risk management more structured and effective throughout the group.

The Group complies with all Anti Money Laundering legislation and other related laws in all jurisdictions in which it operates. Plans are well advanced to stage an AML month to increase the level of awareness of the laws and challenges faced regarding AML.

Liquidity Risk

The Group's liquidity risk is monitored by the Group Asset Liability Committee.

Careful liquidity management ensures that the regulatory reserve requirement is always met by the domestic banks and that Capital Adequacy Ratios remain above minimum levels. The Liquidity policy and associated liquidity contingency plans are in place.

Reputation Risk

The Group's reputation; particularly the trust afforded it by customers and counterparties can be irrevocably tarnished due to perceived or real breaches in its ability to conduct business securely and responsibly. In addition, the ECFH Group is responsible for risks associated with the activities of third-party service providers with which they contract.

All risks impact on reputation; therefore, maintaining reputation involves appropriately identifying, analyzing and managing risks that can adversely impact the Group's business. The

Group continued to meet its corporate social responsibility encompassing involvement in local communities, employment practices, impact on the environment and sustainable economic and social development, while maintaining strong relationships with business partners. The Group has developed and adheres to a robust Anti-Money Laundering/Anti -Terrorist Financing policy as well as Corporate Governance policy for the Group. In developing these policies, best international practices were used. The Group has a very solid reputation and reputable image in the market place.
