NOTICE TO INVESTORS

This Prospectus has been drawn up in accordance with the rules of the Regional Government Securities Market (thereafter referred to as RGSM). The Regional Debt Coordinating Committee (RDCC) and Eastern Caribbean Central Bank (ECCB) accept no responsibility for the content of this Prospectus, make no representations as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss whatsoever arising from or reliance upon the whole or any part of the contents of this Prospectus.

This Prospectus is issued for the purpose of giving information to the public. The Nevis Island Administration (NIA) accepts full responsibility for the accuracy of the information given and confirms having made all reasonable inquiries that to the best of its knowledge and belief there are no other facts, the omission of which would make any statement in this Prospectus misleading.

Statements contained in this Prospectus describing documents are provided in summary form only, and such documents are qualified in their entirety by reference to such documents. The ultimate decision and responsibility to proceed with any transaction with respect to this offering rests solely with you. Therefore, prior to entering into the proposed investment, you should determine the economic risks and merits, as well as the legal, tax and accounting characteristics and consequences of this Treasury Bill offering, and that you are able to assume those risks.

This Prospectus and its content are issued for the specific Treasury Bill issue described herein. If you are in doubt about the contents of this document or need financial or investment advice you should consult a person licensed under the Securities Act or any other duly qualified person who specializes in advising on the acquisition of government instruments or other securities.

ABSTRACT

The NIA proposes to raise Twenty Million Eastern Caribbean dollars (EC\$20 million) through the issue of a 365-day Treasury Bill with the guarantee by the Federal Government of St. Kitts-Nevis. The Treasury Bill will be issued in the month of June 2009. The Treasury Bill is being issued to fund a shortfall in the 2009 annual budget due to the temporary closure of the Four Seasons Resort coupled with the effects of the current economic challenges.

The 365-day Treasury Bill will be issued on the Regional Government Securities Market in the month of June 2009 and will be traded on the Eastern Caribbean Securities Exchange Ltd (ECSE) under the trading symbol NVB240610.

The Treasury Bill will be opened for bidding commencing at 9:00 a.m. on June 23, 2009 and close at 12:00 noon on that day.

A competitive uniform price auction will commence at 9:00 a.m. and close at 12:00 noon on June 23, 2009. Settlement for successful bids will take place on June 24, 2009.

I. GENERAL INFORMATION

ISSUER: The Nevis Island Administration

ADDRESS: The Ministry of Finance
Administration Building
Main Street
Charlestown
Nevis
West Indies

EMAIL: financenevis@niagov.com

TELEPHONE NO: 1 869 469 0078

FACISIMILE NO: 1 869 469 5863

CONTACT PERSONS: Honorable Joseph Parry, Premier and Minister of Finance
Mr. Laurie Lawrence, Permanent Secretary, Ministry of Finance
Ms. Karen Hobson, Budget Director, Ministry of Finance
Mr. Colin Dore, Treasurer, Treasury Department

DATE OF PUBLICATION: June 2009

PURPOSE OF ISSUE: Funding of the shortfall in the NIA's 2009 annual budget

AMOUNT OF ISSUE: Twenty Million Eastern Caribbean Dollars (EC\$20,000,000)

LEGISLATIVE AUTHORITY: The Nevis Treasury Bills Ordinance No. 5 of 1985. Amendment No 10 of 2007

INTERMEDIARIES: A complete list of Intermediaries is available in Appendix I

REFERENCE CURRENCY: Eastern Caribbean Dollars (EC\$), unless otherwise stated

II. INFORMATION ABOUT THE TREASURY BILL ISSUE

Face Value:	EC\$20,000,000.00 Treasury Bill to be auctioned in the month of June 2009. The Treasury Bill will be auctioned on the following date:
Auction Date:	June 23, 2009
Settlement Date:	June 24, 2009
Maturity Date:	June 24, 2010
Tenor:	The Treasury Bill will be issued with tenor of 365 days
Principal Repayment:	Bullet at maturity
Issue Price:	Maximum bid price is 6.75%
Discount Rate:	\$ 93.25
Method of Issue:	Determined by a Competitive Uniform Open Price Auction
Bidding Period:	9:00 a.m. to 12:00 noon on June 23, 2009
Security Identifications:	By trading symbols NVB240610.
Placement of Bids:	Investor participation in the auction must take place through the services of any of the licensed intermediaries that are members of the Eastern Caribbean Securities Exchange (ECSE).
Interest Payment:	Interest will be computed on the basis of a 365-day year

Listing:	Duly registered with the ECSE. Treasury Bills will be traded on the Regional Government Securities Market (RGSM) using the platform of the ECSE
Minimum Bid:	EC\$5,000.00
Maximum Bid:	EC\$20,000,000.00
Bid Multiplier:	EC\$1,000.00
Bids per Investor:	Each investor will be allowed one bid with the option of improving their price (interest rate) and increasing the amount being tendered up until the close of the bidding period.
Taxation:	All payments by the Issuer in respect of the Treasury Bills will be made effectively free and clear of any present or future withholding taxes for or on account of any present or future taxes, duties, assessments or other governmental charges of whatever nature imposed or levied by or on behalf of St. Kitts and Nevis or within any political subdivision thereof or any authority therein having power to tax (“Taxes”).
Status of the Securities:	The Treasury Bills will constitute direct, secured and unconditional obligations of the Issuer, respectively, and will at all times rank at least pari passu in priority of payment with all other present and future unsecured and unsubordinated obligations of the Issuer, save only for such obligations as may be preferred by mandatory provisions of applicable law.
Governing Law:	The National Assembly of Saint Christopher and Nevis will provide a guarantee for the Twenty Million Eastern Caribbean Dollars Treasury Bills issue under Resolution No. 42 of 2008 and amendment No. 5 of 2009. The Treasury Bills will be governed

by and constructed in accordance with the St. Christopher and Nevis Finance Administration Act, 2007.

Terms of the Guarantee:

The National Assembly has authorized the Minister for Finance to guarantee the Nevis Island Administration's one year Treasury Bill Issue of Twenty Million Dollars Eastern Caribbean Currency (E.C.\$20,000,000.00) to be issued on the Regional Government Securities Markets by the Eastern Caribbean Securities Exchange. This Resolution, No. 42 of 2008 was approved by the National Assembly on the 11th day of November, 2008 and amended on the 3rd March, 2009. The Treasury Bills will be governed in accordance with the Finance Administration Act, 2007 and the Nevis Treasury Bill (Amendment) Ordinance, No. 10 of 2007."

Contact information for the Intermediaries is presented in **Appendix I**.

III. ADMINISTRATIVE AND CONSTITUTIONAL FRAMEWORK

St Kitts and Nevis became a Federation after achieving independence from Britain in 1983. The Constitution of St. Kitts and Nevis, Statutory Instrument No. 881 of 1983 (“the Constitution”) enabled the authorities in Nevis to enjoy increased power and responsibilities for the development and management of the resources of the island. Consequently, the island has its own legislature with the exclusive powers to make laws, styled Ordinances, for the peace, order and good governance of Nevis (s.103).

These powers are detailed in Schedule 5, Part 1 of the Constitution. Importantly, the powers extend to “the borrowing of money, or obtaining grants of money, for the purposes of the Nevis Island Administration and the making of grants and loans for those purposes”. These powers also include the collection of taxes and the imposition of taxes in certain areas.

Section 102 of the Constitution also provides for the establishment of the Nevis Island Administration (“NIA”) which is responsible for overall governance of the island with the exclusion of Foreign Affairs, Trade and Defense. Section 106 of the Constitution also lists the areas that the NIA has exclusive responsibility for administration but not the power to pass laws. These include airports and seaports; education; extraction and processing of minerals; fisheries; health and welfare; labour; crown lands and buildings; and licensing of imports and exports.

The NIA has its own consolidated fund, collects most of the revenues generated in Nevis, and passes its own appropriation bills in the Nevis Island Assembly. The Ministry of Finance in Nevis has full authority to manage the financial resources of the government and is responsible for the negotiation and repayment of all debts which are charges on the Nevis Island Administration’s Consolidated Fund (s.108). The NIA therefore enjoys a high level of autonomy and has overall responsibility for the economic development of the island.

IV. FINANCIAL ADMINISTRATION AND MANAGEMENT

1. Debt Management Objectives

The debt management objective of the Nevis Island Administration (NIA) is to raise the required amount of funding at the lowest possible cost to undertake projects and programmes that would foster growth and development in the economy, while maintaining positive fiscal balances and a sustainable level of debt.

2. Transparency and Accountability

A priority area for the NIA continues to be increasing transparency and accountability through the publication of data as it pertains to the consolidated financial position of the government. Consequently, the Information Technology Department is involved in finalizing the development of an official website that will assist in this regard. Additionally, the issuance of Treasury Bills on the Regional Government Securities Market (RGSM) will promote the disclosure of information to prospective investors.

3. Institutional Framework

The Administration utilizes the Commonwealth Secretariat Debt Recording and Management System (CS-DRMS) as a tool to record and manage its existing debt. The Fiscal Policy Unit works closely with the Treasury Department and assists with the analysis of the public debt data on a quarterly basis. The Finance Administration Act, 2007, is the existing document that governs borrowing and it ultimately gives the Minister of Finance of the NIA the authority to approve borrowings.

Analysis of the debt portfolio is done on a quarterly basis to assess the effects of interest rate and exchange rate risks on the fiscal balance. However, there is need for a structured framework to analyze debt sustainability in relation to debt payments and the effects of economic and financial shocks on the debt portfolio.

4. Debt Management Strategy

The main elements of the debt management Strategy for the federal government include the following:

- Refocus the fiscal stabilization program to also concentrate on debt reduction;
- Improve expertise available in the Debt Unit;
- Reduction in short term interest rates; including the issuance of Treasury Bills on the Regional Government Securities Market (RGSM);
- Concerted efforts to transform the economy and maintain a growth rate of 3% to 4%.

In addition to these broad debt management strategies other recent objectives were introduced that are essentially geared toward cash flow management for the medium to long term. These debt management strategies are aimed at:

- Improving transparency and accountability;
- Further diversifying the debt portfolio while maintaining a prudent debt structure. The terms of borrowing and an appropriate mix of debt instruments should cater to an improved liquidity situation; and
- Implementing a proper legal framework for the effective and efficient management of domestic and external public debt.

Additionally, the NIA has developed a framework for risk management which includes:

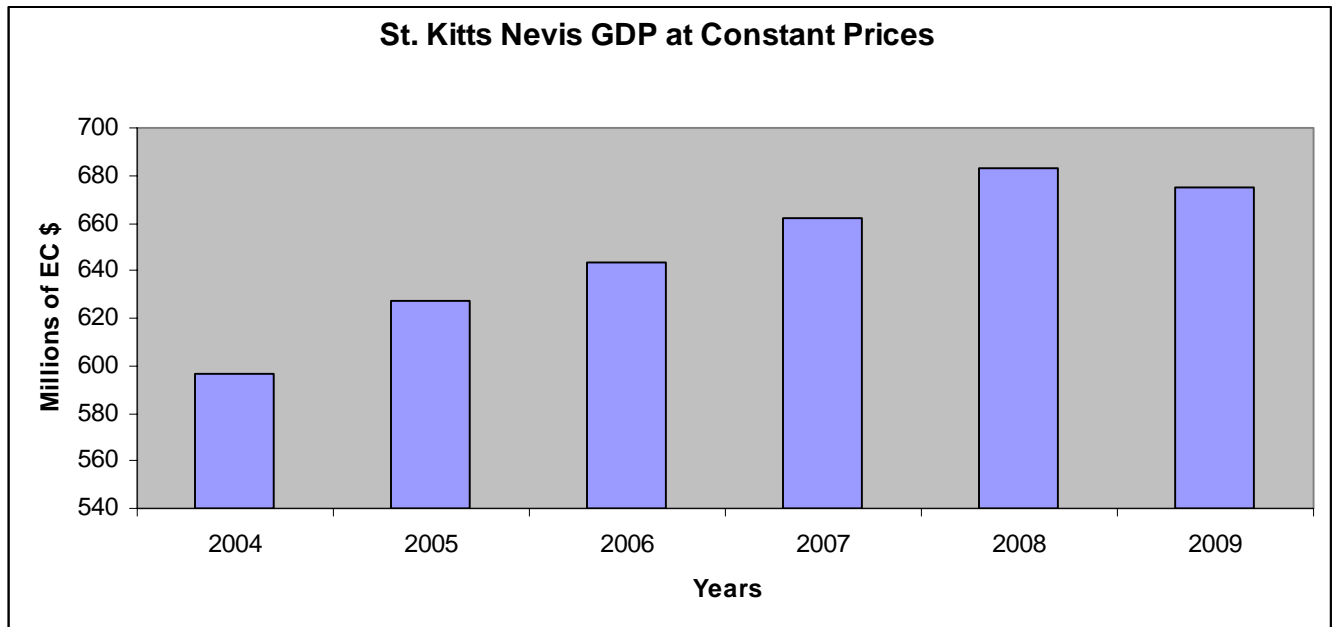

- Minimizing refinancing and rollover risks;
- Minimizing interest rate risks; and
- Minimizing exchange rate risks.

V. ECONOMIC PERFORMANCE

1. MACRO-ECONOMIC OVERVIEW

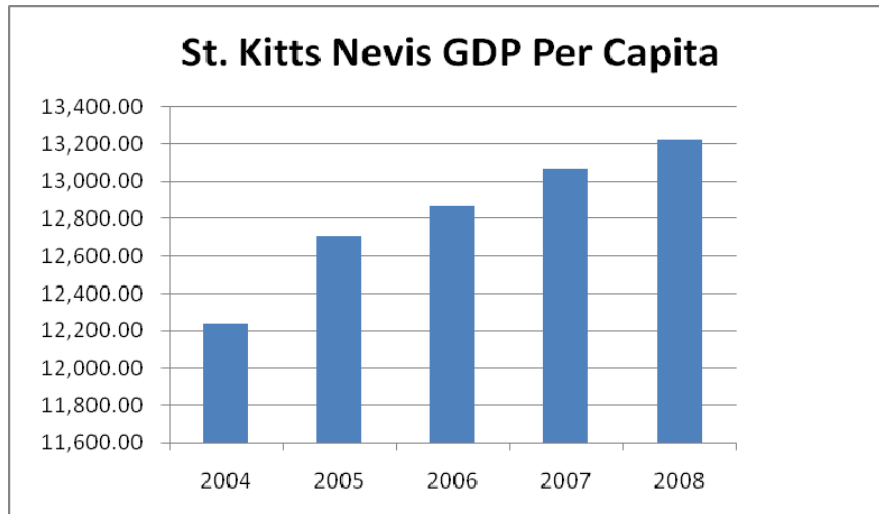

The Federation of St. Kitts and Nevis has a relatively stable economic and political environment. The landscape of the economy has been transformed from a predominantly agrarian to a service-oriented economy. The tourism and financial services sectors are the driving forces behind this economic transformation. For the past five (5) years 2004 – 2008 the Federation’s Gross Domestic Product (GDP) as recorded in constant prices increased from \$596.18 million to \$683.10 million (See Appendix II). This represented an expansion in growth totaling 14.58%. The highest recorded growth was in 2004 and 2005; 7.32% and 5.25% respectively. In 2006, GDP growth was 2.52%, with continued marginal increases in 2007 and 2008. Major contributors to GDP during the period were the construction and the banking sectors. (See Appendix II)

Figure 1: Chart of GDP at Constant Prices

The Federation held the second highest per capita income ranking in the Eastern Caribbean Currency Union and ranks third in the Caribbean in the United Nations Human Development Index for 2007.

Figure 2: Chart of GDP per Capita in EC Dollars

SECTORAL DEVELOPMENT

Tourism

St. Kitts and Nevis has been effective in distinguishing itself as an upscale tourist market for which North America and Western Europe are the main areas of concentration. The overall action plan of the country's policy makers is to enhance the tourism product based on a niche marketing strategy designed to attract fashionable travelers.

The total number of visitor arrivals stood at 349,733 in 2006, a reduction from the 2004 and 2005 periods (See Table 1). However, 2007 once again witnessed an increase in total visitor arrival by 8.79% to 380,459. In that year, although stay over visitor arrivals declined, cruise and yacht passengers increased by 45,283 or 21.99%. 2008 was a difficult year for the Federation's tourist sector, which was reflected in the reduction in stay over passengers in that year. What is noteworthy is the strengthening of the cruise sub- sector. Tangible efforts are being made to enhance this facet of the tourism product which is currently bearing fruits.

There has been an increase in room capacity for hotels and guest houses, from approximately 2,000 to 2,300 for the period of 2002- 2007. Hotel occupancy for the years 2005, 2006 and 2007 averaged 43.00%, 43.42% and 42.00% respectively.

Table 1: Visitor Arrivals in the Federation of St. Kitts and Nevis for 2004 - 2008

YEAR	2004	2005	2006	2007	2008
Total Visitor Arrivals	382,290	364,519	349,733	380,459	525,747

Source: Department of Statistics and Economic Planning St. Kitts

Preliminary real GDP data for the Hotel and Restaurant subsector in 2007 was \$40.74 million, a decrease of \$7.28 million compared to 2006. The estimated GDP for 2008 represents a decrease of approximately 10.00% from the previous period to \$36.67 million. The sector contribution to total GDP was 5.37%. (See Appendix II)

In Nevis, Tourism continues to be the leading sector for the generation of foreign exchange on the island. The sector currently employs approximately 25% of the working population. In 2006 the number of workers employed in this industry was 1,299 whereas in 2007 the number increased to 1,348. Statistics as at December 31, 2008 indicate that there are 10 hotels and 12 guesthouses in operation with rooms totaling 488.

According to the 2007 data at the Vance

Amory International Airport in Nevis, visitor arrivals declined by 5.11% when compared to the previous

period, when arrivals totaled 28,613. In 2008 there was a reduction in passenger arrivals. A number of factors contributed to this reduction such as the fall in the number of airlifts, the international condition and the temporary closure of the Four Seasons Resort.

Table 2: Visitor Arrivals in Nevis for 2006 - 2008

YEAR	QUAR.	USA	CANADA	EUROPE	CARIBBEAN	OTHER	TOTAL

Source: Department of Statistics and Economic Planning –Nevis

As the table indicates the majority of visitors to Nevis were from the United States. The other major markets include Europe, the Caribbean and Canada.

Nevis as a part of the Federation does not generate its own GDP. Therefore to estimate Nevis' share of total GDP the island's share of the population is sometimes used as a proxy. Using this proxy as stated in Appendix IV, tourism GDP for the period between 2004 and 2006 ranged from \$9.57 million to \$11.48 million. The estimates for 2007 represented a slight reduction of \$1.78 million over 2006 while the contribution for 2008 is \$8.73 million.

Construction (St. Kitts and Nevis)

The strength and viability of the construction sector in the Federation is evident from examining the reported real GDP by economic activity. This industry has had a consistent upward movement in GDP for the four (4) years under review, starting at \$89.74 million in 2004 and rising to \$102.68 million by December 31, 2007. Projected data for 2008 reports construction's estimated contribution to real GDP as \$107.30 million. (See Appendix II)

A slowing of the trend is expected in the 2009 period where a decline of 2.98% is forecasted. The industry is propelled by major projects such as tourism developments. Pattern in development will be temporarily hampered by the present economic conditions; subsequently this is expected to be improved once the crisis is resolved.

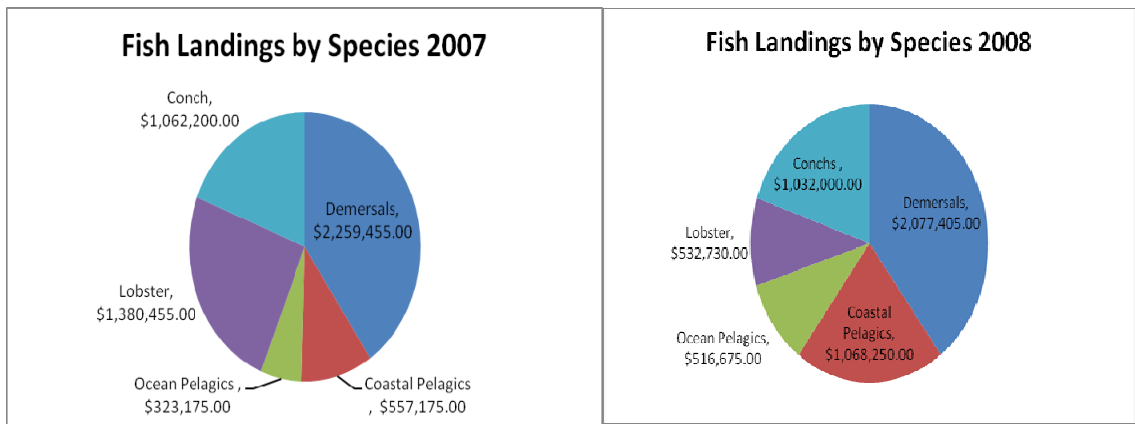

Agriculture (St. Kitts and Nevis)

By comparison, the agricultural industry, recorded a small percentage share of GDP. In 2006 and 2007 the amounts contributed were \$24.02 million and \$26.02 million in constant prices. The industry in the past was the highlight of the federal economy. However, the decline in the price of sugar on the world market resulted in the industry suffering from significant losses for the past two (2) decades. Consequently, the Government of St. Kitts and Nevis made a decision in 2005 to close the industry. This closure created some structural unemployment in the initial stage. However, an effective plan to retrain workers resulted in most of these workers obtaining jobs in other areas in a relatively short period of time.

Agriculture (Nevis)

The agriculture sector's average employment statistic revealed a decrease in the number of persons working in the sector for the 2007 period (when compared to the previous period). This sector over the years has been on the decline. Additionally, the recent increase in input prices has placed increased stress on the industry.

There is also the need for further modernization of some of its factors of production. Some of these include the acquisition of modern machinery and equipment, which may be helpful in increasing productivity in the sector. This lack of technological advancement has been a hindrance in attracting young people into the field. In an attempt to add some vitality to the industry, the island has recently reintroduced the production of cotton for which it has secured a market in Japan. The island also has relatively small farmers who produce to satisfy the local market demand. Crop production measured in pounds for the years 2003- 2007 has varied significantly. The best production year was 2005; while, 2007 recorded the lowest production. The total fish landing for the 2007 period was valued at \$5.58 million. For the 2008 period the estimated value was \$5.23 million a decline of 6.27%.

Monetary and Financial Sector (St. Kitts and Nevis)

St Kitts and Nevis has a small but developing financial sector. This sector is comprised mainly of commercial banks, insurance companies, credit unions, a development bank and international financial service providers. The current global financial credit crunch has created some tightening of liquidity in the external markets. In addition, the temporary closure of Four Seasons Resort is expected to affect loan performance negatively in 2009.

Commercial banks' reserves for the period 2006 to 2007 were well above the legal requirement of 6% as stipulated by the Eastern Caribbean Central Bank. As at December 31, 2007, the net reserves held by

commercial banks were \$201.39 million which exceeded the statutory requirements by \$51.19 million or 34.08%.

Monetary Survey Analysis

A comparison of the monetary position of the Federation for the periods of 2004 and 2008 highlighted the rise in Net Foreign Assets of \$459.58 million or 160.08% (See Appendix XI). The increase in 2007 over that of 2006 was 21.75%, whereas in 2008 the increase was \$189.11 million or 33.92%. Total Domestic Credit increased by 47.84% over the five year period from \$1,088.28 million in 2004 to \$1,608.94 million in 2008.

In 2008 Total Monetary Liabilities rose to \$1,650.51 million from \$1,199.03 million in 2004. Over the period Time Deposits increased by 37.40%, Savings Deposits 43.76% and Foreign Currency Deposits 25.13%. Foreign Currency Deposits however, had its most significant years in 2006 and 2007 when it was recorded at \$418.99 million and \$455.39 million respectively.

Table 3: Commercial Banks' Selected Interest Rates

Period Ended	DEPOSITS								LENDING			
	Savings		TIME						Prime Rates		Other Rates

Source: Eastern Caribbean Central Bank Financial Statistics Yearbook 2008

Financial Services Sector (Nevis)

Employment in the financial services sector in Nevis witnessed a slight reduction in 2007 over 2006. 232 persons were employed in 2006 out of a total employment statistics of 5,264 while 215 were employed in 2007 out of 5,224. Consequently, the number of workers in the industry witnessed a reduction of 7.33% for the period 2007 over that of 2006. This includes data for the banking, insurance

and offshore sectors. Data from the Labour Department - Nevis indicates that approximately 4% of the workforce is currently employed in the financial sector.

The estimated revenue from the financial services sector ranged between \$31.38 million to \$60.40 million between 2003 and 2007. This represents an average annual percent increase of 18.09%. The percentage increase for the period of 2007 over 2006 was 11.38%.

Balance of Payments (St. Kitts and Nevis)

The 2007 period witnessed a decrease in the overall balance of \$26.91 million to \$19.39 million. The closure of the sugar industry has resulted in a widening of the current account balance to (\$229.82) million and (\$297) million in 2006 and 2007 correspondingly. The impact of the closure was felt mainly on the island of St. Kitts. Nonetheless, the Federation has been gradually recovering. Consequently, it is expected that the furtherance of the current account imbalance brought about because of the closure of the industry will diminish. The EC currency has been stable over the years as prudent monetary policies administered by a relatively independent central bank have ensured its monetary stability. (See Appendix X)

Due mainly to the influx of direct investment, the capital and financing accounts on the balance of payments recorded surpluses during the period 2003 – 2007.

Table 4: Selected St. Kitts and Nevis Data in % and Millions of EC\$

Years	2004	2005	2006	2007	2008

VI. INVESTMENT POLICIES AND ECONOMIC PROSPECTS

One of the top priorities of the Nevis Island Administration is to encourage, nurture, and catalyze local and foreign investments. Presently, the NIA provides fiscal incentives in the form of tax holidays, and customs duty exemptions for hotels, manufacturing operations, and light industries. The cabinet also uses its executive powers to offer similar concessions to novel projects and those with the potential for generating significant employment. To give a boost to the attraction of investment capital, the NIA recently established the Nevis Investment Promotion Agency (NIPA). This Unit will operate as a one-stop agency, and manage and coordinate the inputs from the various government departments to create a hassle free environment for existing and potential investors. The agency will also actively promote investments at home and abroad, provide advice to investors, undertake research, and advise government on ways to improve private\public sector partnerships. The NIA is in the process of drafting comprehensive legislation and the requisite regulations to simplify and bring greater clarity and transparency to the investment facilitation function in Nevis.

While the downturn in the US economy is likely to negatively affect the tourism industry in Nevis, the NIA is very optimistic about the future. One of the most exciting projects is the exploration for geothermal energy resources. In 2003, the OAS initiated a study under the Geo-Caraibe Project to determine the potential for the production of geo-thermal energy in three islands of the Eastern Caribbean namely St Kitts and Nevis, Dominica and Saint Lucia. The results of that study indicated that Nevis had the potential to produce about 900 megawatts of electricity. Subsequently, West Indies Power Company signed an agreement with the Nevis Island Administration for the rights to explore for geo-thermal energy. The company has already discovered three wells which are estimated to have the capacity to generate 300 megawatts of electricity. The output from these wells can supply the demand for electricity in Nevis and other Caribbean islands. Drilling has been suspended for the moment while efforts are focused on production. The first phase of the production stage is to acquire a single flash plant to generate electricity for both St Kitts and Nevis. The plant is expected to be commissioned in early 2010. The second phase will involve building the capacity to export electricity to other islands via underwater electricity cables. The geo-thermal experts at the company believe that they have found the underground reservoir and thus the drilling of other wells will be very easy. The project is expected to be implemented fully over a period of 10 years.

It is anticipated that the geothermal energy will not only bring stability to the price of electricity in Nevis, but will reduce the cost of electricity to consumers as the present fuel surcharge paid by

customers will be reduced significantly in the initial stage and will be eliminated overtime. Consequently, the exploitation of this resource will have a significant economic impact on the island of Nevis. In addition to the revenues that will accrue from royalties and dividends, the lower cost of electricity will attract many new industries and expand existing ones.

Other priorities for the NIA are Information and Communication Technology (ICT), Tourism and Financial Services. Bell Canada has recently established a Call Centre in Nevis. Presently, the company employs 156 persons and additional space is being negotiated to increase the capacity to over 200. The NIA has also signed a memorandum of understanding with a telecommunications company, 21st Century, to establish its headquarters in Nevis. The company is planning to offer mobile telecommunication services to Caribbean nationals and sea and land based tourists.

A potential investor has already been given an option by the Nevis Island Administration to purchase approximately 230 acres of land at Indian Castle to construct an Aman Resort in Nevis at an investment value of about US\$400 million. Preliminary mapping and design work has already begun with the objective of commencing construction in late 2010 or early 2011. There are several existing hotel and villa projects undergoing expansions which will result in investments of over US\$50 million. These include the Cliffdwellers development which is near completion of 50 villas and condominiums, Mount Nevis with its ongoing villa development, and Nelson Spring Condominiums which has begun its second phase, which included the construction of 30 condominium units. The NIA has already given approval to about 10 new hotels, villa and condominium projects at an estimated investment value of US\$300 million. One of these projects, Live Nevis, has already started construction of 20 high end Villas at Clifton Estate. Some of these proposed developments have already acquired land and are awaiting approval from the Planning Department to begin construction. However, it is anticipated that a number of these projects will be delayed as a result of the global financial and economic crisis.

Nevis has a very vibrant offshore financial services sector with our core products being the registration of international business companies, limited liability companies and trusts. The sector was negatively affected by the black listing of St Kitts and Nevis by the Financial Action Task Force (FATF) in 2000. However, the sector has been achieving steady growth since the black listing was removed in 2002. In addition to the core products, the NIA has added new projects including captive insurance and reinsurance, foundations, and mutual funds administration. Nevis has over 20,000 entities registered in Nevis contributing to about 10% of government's revenue. The sector is now second to tourism in terms

of its economic impact on the local economy. The biggest risk to the sector is the threat by the OECD countries to black list tax centers that are not complying with their request for greater transparency and easy access to tax information. However, the NIA continues to improve its regulatory infrastructure as members of the Caribbean Financial Action Task Force (CFATF), and already the NIA has been proactive in opening dialogue with the OECD to comply with the requests that our constitution allows.

Despite these challenges, prospects are encouraging. With the lower energy cost and the expansion in tourism and ICT, we have very high expectations that the financial services sector will continue to grow and play an important role in the economic development of Nevis.

VII. FISCAL OPERATIONS OF THE NIA

Robust revenue collection resulted in an improvement in the current account balance of the NIA for the fiscal year 2008 when compared to 2007. This represented a percentage increase of 6.30% from \$104.93 million in 2007 to \$111.54 million in 2008. This is commendable in light of the present regional and global economic downturn. For the period 2004 - 2008 the current account balance averaged \$13.76 million. The most significant year was 2005 when it peaked at \$23.33 million. The current account surplus for 2006 and 2007 witnessed a decline in the reported amounts which were \$16.02 million and \$9.77 million respectively. (See Appendix VI)

In keeping with the strong revenue collection for 2008, the overall balance reported an improvement of \$19.63 million over 2007; moving from a deficit of \$32.02 million to a deficit of \$12.39 million. For the period 2004 – 2008 the overall balance was at its lowest in 2007 as shown in the

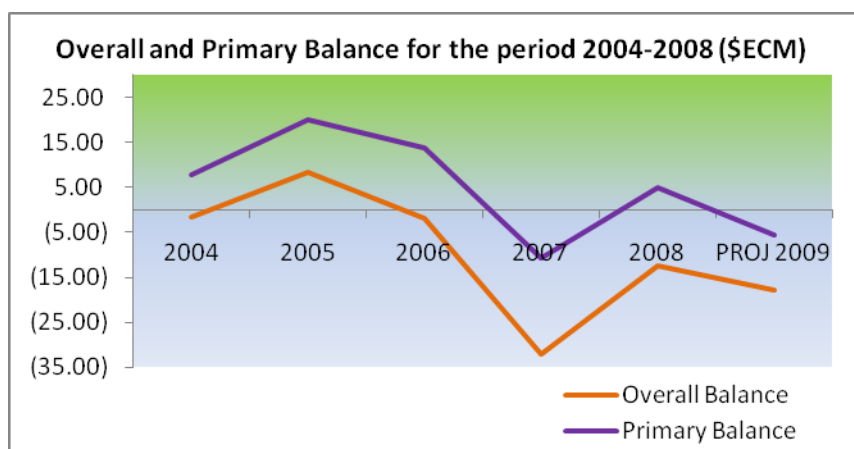

chart on the right. This was primarily due to the construction of the island main road, which was completed in 2008. The primary balance moved in a similar pattern over the same period.

REVENUE PERFORMANCE

Current revenue collection has increased steadily over the past five years with a significant peak of \$111.54 million realized at the end of the fiscal year 2008 as compared to \$104.93 million for 2007. (See Appendix V) With regards to revenue as a percentage of GDP, there is also an upward trend averaging 15.06%. (See Appendix VII) Despite the instability and uncertainty of the global economy, collections in both Tax Revenue and Non-Tax Revenue increased in 2008. Tax Revenue encompassed \$84.78 million with accelerated growth in some of the major tax categories.

Taxes on Income and Profits and Taxes on Property

Corporate Income Tax exceeded expectation which was indicative of \$5.55 million collected in 2008 from \$3.47 million for the corresponding period of 2007 resulting in an increase of 59.90%. During the review period, growth was reflected by receipts from corporations that made their legal obligations in payment of taxes for the first time. Collection of arrears also contributed favorably to this performance. Withholding Tax contributed \$0.05 million of the overall \$14.90 million collected as Taxes on Income and Profits. Social Services Levy increased by 8.50% to \$9.30 million, attributable to an increase in employment, in both the private and public sectors.

Property Tax for 2008 was \$1.80 million compared to \$1.77 million in 2007, a minor 1.69% increase. A more robust performance was anticipated as the NIA in 2008 has modernized the valuation method for the collection of the tax from an annual rental value to the fair market value. The Inland Revenue Department has thus revalued most of the properties on the island to reflect this new method. However, the department has not completed the revaluation of commercial properties for 2008. Subsequently, commercial properties were taxed using the annual rental value for the 2008 period.

Taxes on Domestic Goods and Services

Taxes on Domestic Goods and Services increased by 7.30% to \$31.58 million; collections from Stamp Duty, Consumption Tax (IRD) and Wheel Tax contributed more notably to the higher intake of this category of taxes. Stamp Duty advanced by 26.50% to \$15.81 million parallel with growth in the financial and real estate transactions in the local economy, particularly in the first half of 2008.

Consumption Tax receipts (IRD) expanded by 80.00% to \$0.72 million from \$0.40 million. A significant portion was collected based on outstanding arrears and first time taxpayers. This increase is in line with the development of the construction and service sectors in Nevis. Like Corporation Tax, it

is expected to continue to grow because of an increase in the number of tax payers brought into the tax net.

Hotel and Restaurant Tax yielded a marginal decline of \$0.88 million in the year 2008 when compared to 2007. This reduction was a result of the closure of the Four Seasons Resort which sustained significant damage to the property due to the passage of Hurricane Omar in October 2008. The hotel is expected to be closed until October 2009. While the revenue loss in this area is of concern to the NIA, constant efforts will be made to enhance collection in other areas. Consequently, a committee was recently put in place with the responsibility of collecting government arrears.

Taxes on International Trade

Revenue from Taxes on International Trade rose to \$36.50 million which encompassed a 2.10% increase over that of 2007. This is mainly due to a growth in Consumption Tax (Customs) of 5.00% from \$17.84 million to \$18.73 million in 2007/08 stemming from a higher level of efficiency in employees at the Customs Department. Similarly, such efficiency has effected an improvement in the collection of Customs Service Charge of 6.80% for the year 2008 resulting in a revenue contribution of \$6.80 million. Import Duties experienced a marginal decline due to an increased level of exemptions in 2008.

Non Tax Revenue

Non Tax Revenue increased by an average of \$23.28 million over the period 2004-2008. The growth in 2008 over 2007 fiscal year amounted to \$1.76 million; from \$25.00 million in 2007 to \$26.76 million in 2008. Revenue collected from the issuance of Passport and Permits appreciated to \$1.25 million indicative of the growth in economic activity for the period. Financial Services contributed 43.10% to overall Non Tax Revenue, totaling \$11.54 million in 2008. The marginal increase in Water Services resulted from the government's commitment in collecting arrears.

EXPENDITURE PERFORMANCE

The 2008 period recorded total current expenditure of \$102.43 million; representing an increase of 7.60% over 2007. The increase in current expenditure over the period 2004 -2008 averaged an amount of \$83.42 million. This expenditure does not include Principal Repayment on loans which were \$13.53 million in 2008 and \$15.26 million in 2007. The wage bill attributed to the increase which was primarily due to increases in salaries and wages in 2007 and 2008 totaling 12.5%.

The increases in the general price levels in the first half of the year is one of the major elements that resulted in the increase in goods and services. The Administration has also embarked on a vigorous campaign to improve the islands human capital by spending significantly on tertiary education and training. (See Appendix VI)

The Administration implemented stringent measures to curtail capital expenditure for the fiscal year 2008. As a result, analysis of the data disclosed the following facts:

- The rate of increase in the current expenditure for 2008/07 when compared to the 2007/06 period was reduced by 8.60%.
- Capital expenditure fell by \$19.59 million or 46.90%.

VIII. PUBLIC DEBT

The Nevis Special Development Loans (Amendment) Ordinance, no 2 of 2003, gives permission to the Nevis Island Administration to borrow up to EC\$225 million; exclusive of Treasury Bills, Overdraft facilities and Government Guaranteed debt. As at the end of fiscal year 2008, this amount was at \$150.51 million, which is well below the specified limit.

Total public sector debt stood at \$352.40 million at December 31, 2008, representing an increase of 3.99% when compared to the 2007 period. A comparative analysis of the debt data for 2008 and 2007 revealed a slight decline of 1.71% in government guaranteed debt and an increase of 5.61% in the government's debt stock. There was no additional debt contracted for the period; however, the increased use of the overdraft facilities and rolling over of Treasury Bills resulted in an increase of the domestic debt stock of the NIA. The advancement of the government's debt stock over the years was primarily driven by the outlay of capital expenditure, in particular to fund infrastructural development on the island. The total public sector debt to GDP ratios for 2007 and 2008 were 51.33% and 51.52% respectively. Similarly, the improved performance of revenue agencies resulted in a 7.06% reduction of the debt service ratio of the NIA, amounting to 27.75% in 2008. With enhanced fiscal policies and the efficiency of the revenue centers, reductions are also anticipated over the medium term. (See Appendix IX)

The composition of public debt at December 31, 2008 was foreign debt of \$153.47 million; including \$55.58 million for government guaranteed debt, and domestic debt of \$198.93 million, of which government guaranteed debt, represents \$17.87 million.

Over the years foreign debt for the Administration has been declining. This resulted from a shift to domestic financing and the commitment to reduce the stock of debt through amortization. The main components of the increase in domestic debt were The Bank of Nevis Ltd. loan for the construction of phase III of the island main road, the capital financing for National Piling for construction of the Barnes Ghaut road along with an increase in the stock of Treasury Bills.

DOMESTIC DEBT

Concentrated efforts have recently been placed on seeking domestic financing as opposed to external financing. As at December 2007, there was an expansion of the public outstanding domestic debt stock of 16.46%; from \$170.82 million to \$198.93 million at the same period in 2008. This increase in financing generally resulted from increased use of the overdraft facilities of the Public Corporations in addition to the increases by the NIA. The stock of NIA 91 day treasury bills, particularly, has been increasing as it offers an attractive interest rate of 6.50%. As at December 2006, it stood at \$50.40 million; increasing to \$54.72 million at December 2007 and then to \$62.90 million at December 31, 2008. These T-Bills are issued over the counter at the Treasury Department and approximately 41% of the value is held by individuals. Other major participants are Commercial Banks, Insurance Companies and Social Security in the Federation of St. Kitts Nevis. In entering the RGSM, the NIA hopes to reduce its rollover risks firstly by extending the maturity period to a 365 day issue and secondly by broadening the base for its potential investors to other geographic areas thus targeting a more diverse range of investors.

FOREIGN DEBT

Over the years, the NIA's outstanding stock of external debt has been declining. Alternatively, government guaranteed external debt has been increasing altogether; declining slightly in 2005 and 2008. (See **Appendix IX**)

As at December 31, 2008, the stock of external debt totaled \$153.47 million, representing an increase of 8.68% in overall external debt stock. A contraction was realized for both government and government

guaranteed external debt stock. This is due to the fact that there was no additional debt contracted, while servicing of the debt continued.

The current external debt portfolio consists of bonds and loans, with over 80% originating in US currency. As the EC dollar remains pegged to the US dollar, the administration minimizes the risks of interest rates fluctuations. Recent pressures in the global economy caused the US dollar to depreciate. As a consequence, contracting external debt that is denominated in other currencies increases the exposure to exchange rate and interest rate risks. The strategy for the NIA over the years gives priority to financing that offers discounted interest rates; hence the Caribbean Development Bank remains the dominant source of external financing, contributing to 39.60% of the total outstanding external debt as at December 31, 2008.

IX. FISCAL PROSPECTS FOR 2009 and 2010

The initial budgeted current revenue for the 2009 fiscal period was set at \$121.76 million; an increase of 5.51% when compared to the \$115.40 million committed in 2008. \$103.71 million was set as the initial current expenditure. Principal Repayment for debt servicing was projected at \$13.98 million. The current account surplus was calculated as \$18.05 million and the overall balance -\$17.65 million.

The external shock to the economy caused by the continued unraveling of the international financial system and the closure of the Four Seasons Resort has resulted in a revision of these initial projections.

Current Revenue

In the revised projection current revenue is set at \$104.05 million. Both tax and non tax revenue were revised downward which were aimed predominantly at capturing changes in the anticipated collections for Hotel and Restaurant Tax, Stamp Duties, Property Tax and Financial Services revenue.

Taxes on Income

The revised Corporate Income Tax is \$4.30 million. The revision of the tax takes two (2) competing factors into consideration:

1. The recent efforts by the NIA to increase the compliance rate through education and the strengthening of the Audit Division at the Inland Revenue Department. These efforts have been effective in increasing the number of corporations who filed and paid their taxes in 2008.

2. The anticipated decline in profits in the 2008 and 2009 fiscal periods especially by financial companies.

Additionally, the reduction in the Social Services Levy represents the decline in employment in 2009 brought about by the temporary closure of the Four Seasons Resort and the current overall decline in the tourism sector.

Taxes on Property

This tax is expected to remain low in 2009, as the Administration is still in the process of assessing commercial properties at the fair market value. This process is expected to be completed for the 2010 fiscal period. Accordingly, these types of properties will be assessed using the old method of valuation in the 2009 period.

Taxes on Domestic Goods and Consumption

Hotel and Restaurant Tax and Stamp Duties are two revenue classifications that are directly linked to the performance in the international economic and financial community. Consequently, the downturn in the global market was the one of the factors contributing to the revision of these taxes. Additionally, the temporary closure of the Four Seasons Resort will have a considerable impact on the performance of Hotel and Restaurant Tax. This tax witnessed the greatest revision to \$3.54 million.

Current Expenditure

The Administration, recognizing the impact of the present situation on current revenue, has taken action to vigorously reduce spending for the fiscal year of 2009. Current expenditure is revised at \$101.50 million. There will be vital reductions of current expenditure on Goods and Services and Transfer Payment of 25%. The stated reduction will be brought about through stronger methods of accountability by Permanent Secretaries and Heads of Departments and closer collaboration between these departments and the Ministry of Finance. Salaries, Wages and Debt Servicing have remained unchanged because of the NIA's prior commitment to make these payments.

Capital Expenditure

Capital expenditure in 2009 will consist mainly of ongoing projects. Additional projects will be undertaken only to the extent that they are necessary to encourage vital economic activity. The original budgeted amount is reduced by 50% from \$35.70 million to \$17.85 million.

Fiscal Balances

The preceding measures have resulted in a revised current account surplus of \$2.54 million and an overall balance deficit of \$14.31 million. The projected Primary Balance is calculated as \$3.72 million. (See Appendix VI)

2010 Fiscal Performance

NIA is optimistic about the prospects of the fiscal year 2010; especially in light of the projected recovery of the international economy according to the World Economic Outlook as published by the IMF in April 2009. The Administration also anticipates the resurgence in revenue that was curtailed because of the Four Seasons Resort closure. Total Current Revenue is estimated at \$127.26 million; 22.31% more than the revised projection for 2009 and 4.51% more than the initial projection for that same year (See Appendix V). The most noteworthy change will be in the collection of Hotel and Restaurant Tax (\$11.50 million) and Stamp Duties (\$17.16 million). Property Tax is also expected to increase in the year as commercial property owners are expected to pay the tax using the higher market valuation method.

Import Duties which were relatively stagnant in 2008 and is expected to remain stagnant for the majority of 2009, but is expected to increase in 2010 due to anticipated increased activity in construction. The previously mentioned geo-thermal plant is expected to begin construction in 2009 with the majority of the work expected to be undertaken in 2010. Such a project will have both a direct and indirect impact on the performance of Import Duties and Consumption Tax. Consequently, Import Duties are expected to increase by 20.88% of the revised projection.

In the Non Tax Revenue category the collections at the Financial Services Department was very much hampered by the onslaught of the financial turmoil; thus a recovery in the sector will result in more robust revenue collection.

Current Expenditure for 2010 is projected at \$114.25 million calculating a current account surplus of \$13.01 million which is an increase of \$10.47 million over the 2009 (See Appendix V1). The main classification of current expenditure continues to be salaries and wages and debt servicing.

Capital expenditure is set at \$36.06 million and the Overall and Primary Balance deficits are \$23.05 million and \$4.12 million respectively.

X. CURRENT ISSUES OF GOVERNMENT SECURITIES

1. Non-RGSM Treasury Bills

- Type of Issue – NIA Treasury Bills
- Maturity in days – 91 days
- Maturity dates – January 21st 2009, April 21st 2009, July 21st 2009 and October 21st 2009
- Discount rate – 6.5%

Issues outstanding – EC\$63,995,284

2. Debt Rating

The Nevis Island Administration has not yet been publicly rated by any international or regional rating agency. However, it has always maintained a good reputation with both external and domestic creditors and has been consistent with timely debt service payments.

XI. SECURITY ISSUANCE PROCEDURES, CLEARANCE AND SETTLEMENT, RECORDING OF OWNERSHIP AND SECONDARY ISSUE

The Treasury Bills issue will be listed on the Regional Government Securities Market (RGSM). The RGSM will operate on the Eastern Caribbean Securities Exchange (ECSE) trading platform for this primary issuance and secondary trading. The pricing methodology to be used for selling the securities will be a competitive uniform auction with open bidding. The ECSE is responsible for the dissemination of market information, providing intermediaries with market access, administering the auction process and monitoring and surveillance of the auctions.

It is the responsibility of the Eastern Caribbean Central Securities Depository (ECCSD) to facilitate clearance and settlement for the securities allotted and will ensure that funds are deposited to the account of the Nevis Island Administration. Additionally, the ECSE, through the Eastern Caribbean Central Securities Registry (ECCSR) will record and maintain ownership of the government securities in electronic book-entry form. Other duties of the ECCSR include mailing confirmation of proof of ownership letters to all investors who were successful in the auction and processing corporate action on behalf of issuing governments.

Intermediaries will be responsible for interfacing with prospective investors, collecting applications for subscription and processing the same for bidding on the ECSE platform. Investors must provide the intermediaries with funds to cover the cost of the transaction. Investors will pay the applicable brokerage fee for the intermediaries for this particular issue.

Appendix I shows the list of licensed intermediaries. Successful clients will be informed of their payment obligations and funds will be deducted from their respective account with the intermediary.

The Nevis Island Administration will be subject to the rules and guidelines of the Regional Debt Coordinating Committee (RDCC) as it pertains to regular reporting and disclosure of information.
